Applications of AI and Machine Learning in Finance and Economics Alessia Paccagnini, Maria Iannario, Joerg Osterrieder, Adamaria Perrotta, Fabio Parla, Hanna Kristín Skaftadóttir, 2025-11-19 This Research Topic is in collaboration with the Women in FinTech and AI 2024 conference Extended versions of work presented at the conference are welcome In today's rapidly evolving economic landscape the integration of artificial intelligence AI in finance and economics has become paramount AI fueled by unprecedented computational power and sophisticated algorithms has the potential to revolutionize decision making processes risk management and predictive analytics within the financial sector Its adaptive capabilities and data driven insights contribute to more informed strategies driving efficiency and innovation Moreover the era of big data has ushered in a new paradigm where vast and diverse datasets serve as a cornerstone for informed decision making The intersection of big data and finance allows for a granular understanding of market dynamics customer behavior and economic trends Harnessing the power of big data alongside AI not only empowers financial institutions to navigate complexities but also lays the foundation for sustainable and resilient financial systems in an interconnected global economy We invite researchers and professionals to contribute to a special issue of *Frontiers in Artificial Intelligence* dedicated to the intersection of artificial intelligence and economics and finance This special issue aims

to explore cutting edge advancements in various areas including but not limited to Big Data applied to finance natural language processing in economics digital finance and sustainability AI for financial markets and blockchain applications We welcome submissions on a wide range of topics including Big Data applications in finance and economics Natural language processing in economic and financial contexts Digital finance and its implications for sustainability Artificial intelligence in financial markets Blockchain applications in finance Artificial intelligence for peer to peer finance Network analysis in finance Artificial intelligence in Green Finance and Climate Change Behavioral finance *Proceedings of World Conference on Artificial Intelligence: Advances and Applications* Ashish Kumar Tripathi, Apu Kumar Saha, Vivek Shrivastava, 2026-01-27 This book is a collection of outstanding research papers presented at the World Conference on Artificial Intelligence Advances and Applications WCAIAA 2025 organized by Sardar Patel University Mandi India and is technically sponsored by Soft Computing Research Society during May 17 18 2025 The topics covered are agent based systems evolutionary algorithms approximate reasoning bioinformatics and computational biology artificial intelligence in modeling and simulation natural language processing brain machine interfaces collective intelligence computer vision and speech understanding data mining swarm intelligence machine learning human computer interaction intelligent sensor devices and applications and intelligent database systems **Multidisciplinary Research in Arts, Science & Commerce (Volume-23)** Chief Editor- Biplab Auddya, Editor- Dr. N. Siddharthan, Dr. Akheel Mohammed, Zosangliani, Dr. Vani S V, Mr. Anand G. Shelar, Gadamsetty Surya, 2025-03-20 AI Review of Products, Services, and Research, 1991-07 **Software Reviews on File**, 1986 PC AI, 1998 **Knowledge-based Systems for General Reference Work** John V. Richardson, 1995 By focusing on knowledge based systems technology the primary purpose and goal of this book is to improve the quality of reference service rendered in libraries Within reference service this book examines question answering a complex and difficult task For those interested in the theoretical aspects of reference work they have to look no further than the first chapter In addition the book features theoretical chapters on modelling the reference transaction a chapter on the logic of ready reference work and a chapter on the appropriate criteria to apply in selecting an expert system shell Several practical chapters focus on what KBS work has already been done in the field and evaluate nearly fifty expert system development shells so that readers can select the most appropriate shell for their domain The subtitle of the book is applications problems and progress in regard to expert systems in reference work Applications are covered most clearly in chapter 8 which reviews the more than extant prototypes Chapter 3 covers what is feasible chapter 4 models the reference transaction and chapter 7 covers interface issues so that future applications can be more successful Problems are covered throughout the book starting with chapter 1 which discusses the traditional emphasis on reference sources It argues that the field needs to shift toward procedural knowledge related to work in reference departments The chapter on expert system feasibility reveals that there are alternative ways of conceptualizing the intellectual work of an expert and of course chapter 9 directly points out

limitations in extant systems Encouraging words occur in chapter 1 about the shift to a balanced or complete paradigm for doing reference work Similarly the chapter on modelling is optimistic in that reference work can be modelled and systems implemented which act like human experts The final chapter tries to avoid the technological optimism inherent in many books on expert systems by identifying the near term factors which will influence the development of expert systems Key Features Historical background presenting the field s paradigmatic thinking Decision trees for basic formats of reference material Flowchart modelling the reference transaction Reviews of more than fifty extant KBS in general reference environments Evaluative criteria on more than forty expert system shells
