Hands-On Machine Learning with Scikit-Learn, Keras, and TensorFlow Aurélien Géron,2019-09-05 Through a series of recent breakthroughs deep learning has boosted the entire field of machine learning Now even programmers who know close to nothing about this technology can use simple efficient tools to implement programs capable of learning from data This practical book shows you how By using concrete examples minimal theory and two production ready Python frameworks Scikit Learn and TensorFlow author Aur lien G ron helps you gain an intuitive understanding of the concepts and tools for building intelligent systems You ll learn a range of techniques starting with simple linear regression and progressing to deep neural networks With exercises in each chapter to help you apply what you ve learned all you need is programming experience to get started Explore the machine learning landscape particularly neural nets Use Scikit Learn to track an example machine learning project end to end Explore several training models including support vector machines decision trees random forests and ensemble methods Use the TensorFlow library to build and train neural nets Dive into neural net architectures including convolutional nets recurrent nets and deep reinforcement learning Learn techniques for training and scaling deep neural nets

**Deep Reinforcement Learning in Action** Alexander Zai,Brandon Brown,2020-04-28 Summary Humans learn best from feedback we are encouraged to take actions that lead to positive results while deterred by decisions with negative consequences This reinforcement process can be applied to computer programs allowing them to solve more complex problems that classical programming cannot Deep Reinforcement Learning in Action teaches you the fundamental concepts and terminology of deep reinforcement learning along with the practical skills and techniques you ll need to implement it into your own projects Purchase of the print book includes a free eBook in PDF Kindle and ePub formats from Manning Publications About the technology Deep reinforcement learning AI systems rapidly adapt to new environments a vast improvement over standard neural networks A DRL agent learns like people do taking in raw data such as sensor input and refining its responses and predictions through trial and error About

the book *Deep Reinforcement Learning in Action* teaches you how to program AI agents that adapt and improve based on direct feedback from their environment In this example rich tutorial you ll master foundational and advanced DRL techniques by taking on interesting challenges like navigating a maze and playing video games Along the way you ll work with core algorithms including deep Q networks and policy gradients along with industry standard tools like PyTorch and OpenAI Gym What s inside Building and training DRL networks The most popular DRL algorithms for learning and problem solving Evolutionary algorithms for curiosity and multi agent learning All examples available as Jupyter Notebooks About the reader For readers with intermediate skills in Python and deep learning About the author Alexander Zai is a machine learning engineer at Amazon AI Brandon Brown is a machine learning and data analysis blogger Table of Contents PART 1 FOUNDATIONS 1 What is reinforcement learning 2 Modeling reinforcement learning problems Markov decision processes 3 Predicting the best states and actions Deep Q networks 4 Learning to pick the best policy Policy gradient methods 5 Tackling more complex problems with actor critic methods PART 2 ABOVE AND BEYOND 6 Alternative optimization methods Evolutionary algorithms 7 Distributional DQN Getting the full story 8 Curiosity driven exploration 9 Multi agent reinforcement learning 10 Interpretable reinforcement learning Attention and relational models 11 In conclusion A review and roadmap

**Reimagine Pricing** Jan Y. Yang, 2025-06-11 This book highlights the transformative potential of AI enabled pricing showing how it empowers businesses to unlock revenue optimize customer experiences and gain a competitive edge By combining cutting edge AI technologies with actionable strategies it offers a comprehensive roadmap for organizations looking to move from reactive manual pricing processes to proactive data driven systems that predict adapt and create value in real time Focused on practical applications the book bridges the gap between technological innovation and real world implementation It features a unique blend of strategic insights technical examples including Python code and AI workflows and case studies from industries such as retail travel and manufacturing These examples demonstrate how companies have increased margins reduced churn and driven customer loyalty by leveraging AI It also explores fast evolving trends like autonomous systems blockchain transparency and ecosystem driven pricing making it essential reading for professionals eager to future proof their pricing strategies A key contribution of the book is its focus on the human element of AI adoption It addresses challenges like resistance to change ethical considerations in pricing fairness and building trust with both internal teams and customers By reframing AI as an enabler rather than a replacement the book equips pricing professionals to transition from tactical roles to strategic leadership fostering collaboration between human intuition and machine intelligence The book raises provocative questions How can businesses harness AI without compromising ethics or transparency What skills will pricing teams need to thrive in an AI driven future And how can organizations align AI pricing with broader strategic goals It answers these questions by offering clear actionable solutions and a vision for integrating AI into the heart of business operations transforming pricing from a functional necessity into a strategic differentiator Designed

for business leaders pricing experts and AI enthusiasts this book is not just a guide it s a call to action to embrace the future of AI enabled pricing with confidence creativity and purpose

**Grokking Deep Reinforcement Learning** Miguel Morales,2020-11-10 Grokking Deep Reinforcement Learning uses engaging exercises to teach you how to build deep learning systems This book combines annotated Python code with intuitive explanations to explore DRL techniques You ll see how algorithms function and learn to develop your own DRL agents using evaluative feedback Summary We all learn through trial and error We avoid the things that cause us to experience pain and failure We embrace and build on the things that give us reward and success This common pattern is the foundation of deep reinforcement learning building machine learning systems that explore and learn based on the responses of the environment Grokking Deep Reinforcement Learning introduces this powerful machine learning approach using examples illustrations exercises and crystal clear teaching You ll love the perfectly paced teaching and the clever engaging writing style as you dig into this awesome exploration of reinforcement learning fundamentals effective deep learning techniques and practical applications in this emerging field Purchase of the print book includes a free eBook in PDF Kindle and ePub formats from Manning Publications About the technology We learn by interacting with our environment and the rewards or punishments we experience guide our future behavior Deep reinforcement learning brings that same natural process to artificial intelligence analyzing results to uncover the most efficient ways forward DRL agents can improve marketing campaigns predict stock performance and beat grand masters in Go and chess About the book Grokking Deep Reinforcement Learning uses engaging exercises to teach you how to build deep learning systems This book combines annotated Python code with intuitive explanations to explore DRL techniques You ll see how algorithms function and learn to develop your own DRL agents using evaluative feedback What s inside An introduction to reinforcement learning DRL agents with human like behaviors Applying DRL to complex situations About the reader For developers with basic deep learning experience About the author Miguel Morales works on reinforcement learning at Lockheed Martin and is an instructor for the Georgia Institute of Technology s Reinforcement Learning and Decision Making course Table of Contents 1 Introduction to deep reinforcement learning 2 Mathematical foundations of reinforcement learning 3 Balancing immediate and long term goals 4 Balancing the gathering and use of information 5 Evaluating agents behaviors 6 Improving agents behaviors 7 Achieving goals more effectively and efficiently 8 Introduction to value based deep reinforcement learning 9 More stable value based methods 10 Sample efficient value based methods 11 Policy gradient and actor critic methods 12 Advanced actor critic methods 13 Toward artificial general intelligence

employees and investors it was more than a payday it was a signal of how fast the future of artificial intelligence is reshaping  
money power and technology Valuing the Future The Story Behind OpenAI s 500 Billion Leap takes you inside this record  
breaking deal and explains why it matters for anyone who cares about the intersection of AI and finance This book unpacks  
how AI investing is rewriting the rules of startup valuation how insiders and funds approach private company funding and  
why terms like cap table and diluted valuation have become part of everyday conversations in the tech world It sheds light on  
the unique structures behind OpenAI explores the mechanics of funding rounds explained and offers clarity on what an  
equity sale in tech really means for founders employees and outside investors Readers will benefit from understanding how  
valuation multiples are applied in real scenarios why tech company finance looks different in the AI era and what it means for  
future AI business strategy You ll see the investor perspective AI firms bring when joining billion dollar deals and how tech  
sector valuation is influenced by hype risk and performance By exploring OpenAI s path from a nonprofit lab to a half trillion
