In this book, Andrew Greasley provides a clear and accessible introduction to this important area of study, focusing on all key areas of operations in both manufacturing and service industries. *Operations Management* Second Edition covers the main areas of operations strategy, the design of the operations system, and the management of operations over time. Yet its concise nature of the text means students are not overwhelmed by the amount of material presented. This new edition also features new content in such areas such as the quality gap model, enterprise systems, and business process management. Expanded case studies to include more global and European cases and longer cases at the end of each chapter. Greater clarity in chapter material organization. Worked Examples providing a step by step guide to the procedure to solve quantitative problems. Visual redesign in full colour. More support material for students and lecturers including an interactive WileyPLUS course. All lecturers can access supporting resources on the companion website at www.wiley.com/college/greasley including an Instructor's Manual with suggested solutions for all case study questions and end of chapter exercises, a Test Bank, and PowerPoint slides for each chapter. Students will find multiple choice test quizzes, web links, and an online glossary. *Operations Management* is essential reading for all students studying operations management, whether on undergraduate, postgraduate, or continuing professional development courses.

Operations Management Gérard Cachon, Gaerard Cachon, Christian Terwiesch, 2022. Modern operations means teaching students the content they need in today's world, not the world of 30 or 40 years ago. As a result, services and global are incorporated throughout rather than confined to dedicated chapters. Manufacturing, of course, cannot be ignored, but again the emphasis is on contemporary issues that are relevant and accessible to students. For example, students should learn how to identify the bottleneck in a process and use the ideas from the Toyota Production System to improve performance.
