Blockchain-enabled Fog and Edge Computing: Concepts, Architectures and Applications Muhammad Maaz Rehan, Mubashir Husain Rehmani, 2020-07-27 This comprehensive book unveils the working relationship of blockchain and the fog edge computing. The contents of the book have been designed in such a way that the reader will not only understand blockchain and fog edge computing but will also understand their co-existence and their collaborative power to solve a range of versatile problems. The first part of the book covers fundamental concepts and the applications of blockchain-enabled fog and edge computing. These include Internet of Things, Tactile Internet, Smart City, and E-challan in the Internet of Vehicles. The second part of the book covers security and privacy-related issues of blockchain-enabled fog and edge computing. These include hardware primitive-based Physical Unclonable Functions, Secure Management Systems, security of Edge and Cloud in the presence of blockchain, secure storage in fog using blockchain, and using differential privacy for edge-based Smart Grid over blockchain. This book is written for students, computer scientists, researchers, and developers who wish to work in the domain of blockchain and fog edge computing. One of the unique features of this book is highlighting the issues, challenges, and future research directions associated with Blockchain-enabled fog and edge computing paradigm. We hope the readers will consider this book a valuable addition in the domain of Blockchain and fog edge computing.

Smart Home Automation with IoT Dipankar Saha, 2024-06-26 Enable smart homes with IoT open source technologies. KEY FEATURES: Learn to make your home smarter with IoT and AI at a very low cost. Live examples along with code and circuit samples which you can readily use. Learn scenario-based AI-based home automation techniques. DESCRIPTION: This practical guide Smart Home Automation with IoT shows you how to create a smart home without breaking the bank. Instead of relying on expensive closed systems, you utilize the power of the Internet of Things (IoT) with open source software to design a custom smart home experience that perfectly suits your needs. This book teaches you to create smart home IoT solutions using Raspberry Pi and microcontrollers like Arduino, NodeMCU, ESP8266, and ESP32. You will learn to program these microcontrollers, control relay modules, and use sensors for data collection. The guide covers using OpenHAB, InfluxDB, Mosquitto, MQTT Broker, and Grafana with Raspberry Pi, enabling a unified system without coding. It also shows how to connect OpenHAB to Alexa or Google Home for voice commands and automate tasks like lighting. Bonus content includes using Raspberry Pi GPIO pins, AI-based hand gesture and face detection, and Docker containers. By the end of this book, you will be a confident smart home builder equipped with the knowledge and skills to design, implement, and manage a customized system using open source software. WHAT YOU WILL LEARN: Learn how to implement smart home solutions using open source technologies. Learn programming microcontrollers (ESP32, ESP8266) on Arduino using Arduino IDE to integrate with relays and sensors. Learn how to install and set up Raspberry Pi for home automation server. Learn how to develop Python programs for AI-based automation scenarios. WHO THIS BOOK IS FOR: This book aims to be a useful guide for IoT enthusiasts, engineers, and professionals, as well as

students who want to learn how to DIY smart home automation with IoT

Digital Data Collection and Information Privacy Law Mark Burdon, 2020-04-23

In Digital Data Collection and Information Privacy Law Mark Burdon argues for the reformulation of information privacy law to regulate new power consequences of ubiquitous data collection

Examining developing business models based on collections of sensor data with a focus on the smart home

Burdon demonstrates the challenges that are arising for information privacy's control model and its application of principled protections of personal information exchange

By reformulating information privacy's primary role of individual control as an interrupter of modulated power

Burdon provides a foundation for future law reform and calls for stronger information privacy law protections

This book should be read by anyone interested in the role of privacy in a world of ubiquitous and pervasive data collection

Take the POWER back! Emmanuel Fragnière, George Sullivan, Loïc Viret, 2026-01-22

Take the Power Back is a practical and inspiring guide for anyone ready to rethink energy including individuals communities companies and institutions

At a time of rising energy costs climate uncertainty and ageing infrastructure this book presents a clear choice

remain dependent on centralised systems or take action to establish clean resilient locally managed microgrids

Microgrids are more than just technical solutions they re opportunities

They enable communities to generate store and manage their own energy thereby reducing their exposure to price volatility and their dependence on fossil fuels

They offer environmental benefits economic resilience and the chance to solve local problems with local solutions

This handbook explores the why and how of microgrids from residential rooftops to community scale systems

It covers essential components such as solar panels batteries smart meters and control systems as well as governance

regulation and financial models Whether through turnkey providers or community owned systems microgrids are both achievable and adaptable However this is also a story of empowerment The book highlights the rise of the prosumer citizens who produce and manage their own energy and the role of community engagement in shaping a sustainable future With real world examples and practical advice Take the Power Back demonstrates that energy autonomy is possible and within reach We have a choice We can act Together we can build energy systems that are cleaner smarter and fairer
