comprehensive and detailed presentation of common technologies as well as novel research related to all aspects of greenhouse gases makes this work an indispensable encyclopedic resource for researchers in academia and industry Volume 7 titled Process Modelling and Simulation reviews process modelling and simulation The book reviews modeling studies of GHGs emissions and surveys the details of carbon capture modelling with several well developed processes such as absorbers swing technologies and microstructures It addresses modelling of geological and ocean storage and reviews simulation studies of the chemical conversion of carbon dioxide to any valuable materials The book summarizes essential information required in the simulation and modelling of the processes which are beneficial in carbon capture storage or conversion Introduces modeling and simulation methods of carbon and methane emission Describes modeling and simulation procedures of producing chemicals from carbon as well as methane Discusses modeling and simulation of various technologies for carbon capture

Proceedings, 2003 **Neural Plasticity for Rich and Uncertain Robotic Information Streams** Andrea Soltoggio, Frank van der Velde, 2016-10-31 Models of adaptation and neural plasticity are often demonstrated in robotic scenarios with heavily pre processed and regulated information streams to provide learning algorithms with appropriate well timed and meaningful data to match the assumptions of learning rules On the contrary natural scenarios are often rich of raw asynchronous overlapping and uncertain inputs and outputs whose relationships and meaning are progressively acquired disambiguated and used for further learning Therefore recent research efforts focus on neural embodied systems that rely less on well timed and pre processed inputs but rather extract autonomously relationships and features in time and space In particular realistic and more complete models of plasticity must account for delayed rewards noisy and ambiguous data emerging and novel input features during online learning Such approaches model the progressive acquisition of knowledge into neural systems through experience in environments that may be affected by ambiguities uncertain signals delays or novel features
