## **Submarine Design And The Development Of The Astute Class:**

Department of Defense Authorization for Appropriations for Fiscal Year 2007 United States. Congress. Senate. Committee on Armed Services,2007 Astute Class Nuclear Submarine Owners' Workshop Manual Jonathan Gates,2018-06-05 The Astute class is the largest most advanced and most powerful attack submarine ever operated by the Royal Navy combining world leading sensors design and weaponry in a versatile vessel The submarines are nuclear propelled and fuelled by a nuclear reactor powerful enough to supply a city the size of Southampton Its advanced technology means the submarines will never need to be refuelled They employ the latest technology such as the Sonar 2076 that detects the sound of enemy submarines using the largest number of hydrophones ever fitted to a submarine Linked with powerful onboard electronics these provide the submarines with outstanding sensitivity The Astute submarines are armed with the latest versions of Spearfish heavy weight torpedoes and Tomahawk land attack cruise missiles **The United Kingdom's Future Nuclear Deterrent Capability** Great Britain. National Audit Office,2008 The programme aims to maintain the UK s nuclear deterrent beyond the life of the current system with the introduction into service of the first of a new class of submarines in 2024 The timetable is challenging and the MoD needs to manage key risks if continuous nuclear deterrence is to be maintained The current two year initial concept phase for the new class of submarines requires a series of important and difficult decisions to be taken by September 2009 to keep the programme on track The MoD has appointed a Senior Responsible Owner to co ordinate these decisions The current predicted cost of procuring the new nuclear deterrent is between 15 billion and 20 billion 2006 7 prices as outlined in the 2006 White Paper The future of the UK s nuclear deterrent Cm 6994 ISBN 9780101699426 The estimated operating costs once the new class of submarines comes into operation are similar to those of the current deterrent and the MoD recognises the need by September 2009 to produce robust estimates of whole life costs There are major areas of uncertainty in the budget including the provision for contingency and VAT The submarine industry is a highly specialised industrial sector with a number of monopoly suppliers and there are real difficulties in providing the right incentives for these suppliers to deliver to time and budget The tight timetable set for ensuring the seamless transition from the present Vanguard class of submarines to the future class is challenging A further risk to the programme is a shortage of nuclear related skills in industry and within MoD potentially aggravated by competition from civil nuclear projects The future of the UK's strategic nuclear deterrent Great Britain: Parliament: House of Commons: Defence Committee,2006-12-19 In its White Paper published in December 2006 as Cm 6994 ISBN 0101699425 on the future of the UK s nuclear deterrent the Government reaffirmed its commitment to maintain the submarine based Trident weapons system This will require the procurement of a new generation of nuclear powered Trident submarines to replace the current fleet of Vanguard class submarines Following on from the Committee s earlier report on the strategic context and timetable for decision making on the renewal of the UK s nuclear deterrent HCP 986 session 2005

06 ISBN 0215029445 this report focuses on issues related to the UK manufacturing and skills base These include the level of investment needed to sustain essential infrastructure and core skills in the UK submarine construction industry the potential consequences of a gap in the submarine building programme for the long term viability of the domestic manufacturing and skills base the implications of the rationalisation of the UK shipbuilding industry for the construction maintenance and affordability of a Vanguard class successor and the linkage between the Government s Defence Industrial Strategy and the decision on retention replacement or abolition of the UK s Trident system It also examines the Government s investment programme at the Atomic Weapons Establishment and the possible impact of a new civil nuclear build programme for the retention of nuclear skills and expertise in the military sector *Major Projects Report 2005* Great Britain: National Audit Office,2005-11-25 This is a companion volume to the main report HCP 595 I session 2005 06 ISBN 0102936250 and contains project summary sheets for the 30 projects covered [Major projects report 2007](#) Great Britain: National Audit Office,2007-11-30 The Major Projects Report 2007 covers cost time and performance data for military equipment projects in the year ended 31 March 2007 20 of the largest projects are examined where the main investment decision has been taken by the Ministry of Defence the MoD along with ten projects still in the Assessment Phase Overall the MoD is in a similar position to 2006 for forecast cost and performance but there continue to be time delays The current total forecast cost for the 20 largest projects is 28 billion which is 2.5 billion over the most likely budget when the main investment decision was taken The MoD expects ten projects to deliver within their most likely budgeted cost Most of this cost growth occurred in earlier years but on two projects the Type 45 Destroyer 354 million and the Astute Class Submarine 142 million there has been significant cost growth in year The MoD has now agreed revised contracts on both of these projects to incentivise industry to reduce costs The MoD was again pro active in limiting potential in year cost increases on individual projects through reassessing requirements reducing quantities of equipments and re allocating expenditure to other projects or budget lines Five projects were delayed by a total of an extra 38 months this year Of these the most significant were the Type 45 Destroyer which has been delayed by a further 11 months and the Terrier and Next Generation Light Anti Armour Weapon projects have each been delayed by a further 12 months Detailed Summary Sheets for each of the 30 Projects are in Volume 2 HCP 98 II ISBN 9780102951493 There have been significant developments of interest on a project that appeared in the Major Projects Report until 2002 03 the Landing Ship Dock Auxiliary project and detailed findings are given in Volume 3 HCP 98 III ISBN 9780102951509 **The United Kingdom and Nuclear Deterrence** Jeremy Stocker,2013-05-13 In December 2003 the British government announced that within a few years it would need to take decisions about the future of Britain s strategic nuclear deterrent Exactly three years later its plans were revealed in a White Paper The existing Trident system is to be given a life extension which includes building new submarines to carry the missiles costing 15.20 billion Britain has a substantial nuclear legacy having owned nuclear weapons for over half a century The strategic context for the deterrent has

changed completely with the end of the Cold War but nuclear weapons retain much of their salience This Adelphi Paper argues that it makes sense to remain a nuclear power in an uncertain and nuclear armed world Given that deterrence needs are now less acute but more complex than in the past the paper asserts that deterrence also needs to be aligned with non proliferation policies which seek to reduce the scale of threats that need to be deterred Somewhat overlooked in current policy are appropriate measures of defence which can raise the nuclear threshold and if required mitigate the effects of deterrence failure It concludes that the government s decisions about the future form of the deterrent are very sensible but cautions that they still need to be integrated into a broader policy that embraces diplomacy deterrence and defence to counter the risks posed by nuclear proliferation
