Susana Y Javier Chapter Summaries:

Literary Censorship in Francisco Franco's Spain and Getulio Vargas' Brazil, 1936-1945 Gabriela de Lima Grecco, 2020-04-14 This book presents two systems of censorship and literary promotion revealing how literature can be molded to support authoritarian regimes The issue is complex in that at a descriptive level the strategies and methods new states use to control communication through the written word can be judged by how and when formal decrees were issued and how publishing media whether in the form of publishing companies or at the individual level engaged with political overseers But equally literature was a means of resistance against an authoritarian regime not only for writers but for readers as well From the point of view of historical memory and intellectual history stories of people without history and the production of their texts through the literary underground can be constructed from subsequent testimony from books sold in secret to the writings of women in jail to books that were written but never published or distributed in any way and to myriad compelling circumstances resulting from living under fascist authority A parallel study on two fascist movements provides a unique viewpoint at literary social and political levels Comparative analysis of literary censorship literary reward allows an understanding of the balance between dictatorship official policy and what literary acts were deemed acceptable The regime need to control its population is revealed in the ways that a particular type of literature was encouraged in the engagement of propaganda promotion and in the setting up of institutions to gain international acceptance of the regime The work is an important contribution to the history of twentieth century authoritarianism and the development fascist ideas **Marxism and Psychoanalysis** David Pavon-Cuellar, 2016-12-19 The methods developed by Freud and Marx have enabled a range of scholars to critically reflect upon the ideological underpinnings of modern and now postmodern or hypermodern western societies In this intriguing book the discipline of psychology itself is screened through the twin dynamics of Marxism and psychoanalysis David Pavon Cuellar asks to what extent the terms concerns and goals of psychology reflect in fact the dominant bourgeois ideology that has allowed it to flourish The book charts a gradual psychologization within society and culture dating from the nineteenth century and examines how the tacit ideals within mainstream psychology creating good citizens or productive workers sit uneasily against Marx and Freud's ambitions of revealing fault lines and contradictions within individualist and consumer oriented structures The positivist aspiration of psychology to become a natural science has been the source of extensive debate critical voices asserting the social and cultural contexts through which the human mind and behaviour should be understood This challenging new book provides another voice that in addressing two of the most influential intellectual traditions of the past 150 years widens the debate still further to examine the foundations of psychology The Balance between Worker Protection and Employer Powers Nuno Cerejeira Namora, Duarte Abrunhosa e Sousa, 2019-01-17 This book analyses the most important problems and challenges of the current labour market from the point of view of the balance between the parties of the employment contract The contributions here are related to various

Anarchism and eugenics Richard Cleminson,2019-05-22 At the heart of this book is what would appear to be a striking and fundamental paradox the espousal of a scientific doctrine that sought to eliminate dysgenics and champion the fit as a means of race survival by a political and social movement that ostensibly believed in the destruction of the state and the removal of all hierarchical relationships What explains this reception of eugenics by anarchism How was eugenics mobilised by anarchists as part of their struggle against capitalism and the state What were the consequences of this overlap for both anarchism and eugenics as transnational
