Taxation of Petroleum Products Mrs.Poonam Gupta,Mr.Walter Mahler,1994-03-01 The domestic taxation of petroleum products is an important source of revenue in most countries However there is a wide variation of tax rates on petroleum products across countries which cannot be explained by economic theory alone This paper surveys different considerations advanced for taxing petroleum and presents petroleum tax rate data in 120 countries It concludes that a significant reduction in the present extremely wide variation in petroleum prices and tax rates appears warranted

Stock Prices, Real Exchange Rates, and Optimal Capital Accumulation International Monetary Fund,1988-04-05 This paper analyzes the dynamics of the real exchange rate and the price of equity for a small open economy using an optimizing model in which the process of capital accumulation entails adjustment costs The analysis demonstrates that along an adjustment path toward long run equilibrium appreciation of the real exchange rate will accompany a decline in the market price of equity whereas depreciation of the real exchange rate will accompany a rise in the price of equity This relationship results from the requirement that non traded inputs are used in the investment process In the short run though the effects on these variables depend critically on whether disturbances originate in the non traded sector and on whether disturbances are perceived as temporary or permanent The disturbances considered include changes in fiscal policies as well as changes in the world interest rate

Inequality Anthony B. Atkinson,2015-05-11 Inequality and poverty have returned with a vengeance in recent decades To reduce them we need fresh ideas that move beyond taxes on the wealthy Anthony B Atkinson offers ambitious new policies in technology employment social security sharing of capital and taxation and he defends them against the common arguments and excuses for inaction

Taxation and the Cost of Capital in Hungary and Poland International Monetary Fund,1990-12-01 This paper compares the effective rates of taxation faced by a representative investor located in a major capital exporting country for investments in machinery and buildings in nine capital importing European countries Poland and Hungary are found to have relatively high effective tax rates on equity financed investment The analysis suggests that both countries would benefit from streamlining capital cost recovery allowances and possibly lowering statutory corporate tax rates as permitted by the revenue constraint rather than providing tax preferences for foreign investors

Tax Policy Options for a United Germany International Monetary Fund,1990-10-01 A central requirement in the rapid movement of German Democratic Republic GDR toward a market economy is the introduction of a market oriented tax system The paper highlights the main features of the traditional socialist tax structure of the GDR and the current tax structure of the Federal Republic of Germany FRG Arguments for an adequate short term tax reform in the GDR are developed in two scenarios contrasting the approach of taking over the FRG tax system adoption scenario and an autonomous tax reform in the GDR reform scenario Both scenarios recommend a flexible

adjustment approach which anticipates the medium term development of the German tax system pursuant to domestic reform requirements international tax harmonization and fiscal federalism *Quicken 2006* Maria Langer,2005 Here is the new edition of the only authorized guide to the top selling personal finance software Big Java Cay S.
