Playful Visions Meredith A. Bak, 2020-03-17 The kaleidoscope the stereoscope and other nineteenth century optical toys analyzed as new media of their era provoking anxieties similar to our own about children and screens In the nineteenth century the kaleidoscope the thaumatrope the zoetrope the stereoscope and other optical toys were standard accessories of a middle class childhood used both at home and at school In *Playful Visions* Meredith Bak argues that the optical toys of the nineteenth century were the new media of their era teaching children to be discerning consumers of media and also provoking anxieties similar to contemporary worries about children's screen time Bak shows that optical toys which produced visual effects ranging from a moving image to the illusion of depth established and reinforced a new understanding of vision as an interpretive process At the same time the expansion of the middle class as well as education and labor reforms contributed to a new notion of childhood as a time of innocence and play Modern media culture and the emergence of modern Western childhood are thus deeply interconnected Drawing on extensive archival research Bak discusses among other things the circulation of optical toys and the wide visibility gained by their appearance as printed templates and textual descriptions in periodicals expanding conceptions of literacy which came to include visual acuity and how optical play allowed children to exercise a sense of visual mastery She examines optical toys alongside related visual technologies including chromolithography which inspired both chromatic delight and chromophobia Finally considering the contemporary use of optical toys in advertising education and art Bak analyzes the endurance of nineteenth century visual paradigms

Teaching Today's Mathematics in the Middle Grades Art Johnson, Kit Norris, 2006 *Teaching Today's Mathematics in the Middle Grades* provides current and future middle school teachers with the mathematics content essential concepts methodology activities and resources to both learn and teach mathematics in grades 5 to 8 The authors focus exclusively on the middle school learner and the middle school mathematics curriculum Although each chapter discusses foundational mathematics concepts from earlier grades and previews topics that will follow the middle grades the emphasis is on the middle school This selective focus allows for proper development of critical topics in the middle school such as proportionality algebraic thinking and the integral role of manipulatives Assessment practices and problem solving are also emphasized from the viewpoint of effective practices for middle school students Unique Features React and Reflect features prompt classroom discussions by asking the reader to think independently regarding a statement issue or concern Try This features ask the reader to solve a problem first or extend the current discussion by working on an extension of a problem By completing the problem first teachers are putting themselves

in the place of their students helping the teacher discover first hand common misconceptions Numerous exercises and activities appear at the end of each chapter to reinforce student understanding of various topics and ensure mastery of the mathematics content The NCTM Principles and Standards are emphasized throughout the book beginning with a discussion in Chapter 1 Each of the content chapters 6 11 opens with the relevant NCTM content standards for that chapter In addition marginal icons highlight areas within the text in which the NCTM process standards are discussed Reviewers rave From the content organization and approach it is evident that the authors have years of teaching experience This gives the text authority Marina Krause California State University Long BeachThe authors do an excellent job of presenting in sequential order essential concepts methodology activities and technological resources essential to assist the beginning math teacher in preparing to teach in the middle school program Gerald Jarmon North Carolina Central University

Make: Three Modes of Making Matt Zigler,2023-12-19 The Maker movement has been an excellent opportunity for people to become producers rather than just consumers and schools are recognizing the value of offering students the tools materials and skills necessary to design sophisticated and meaningful projects But teaching technical skills should not be the end goal At its best a Maker education teaches students to think and act in creative ways that can be applied to difficult challenges in all areas of life Three Modes of Making provides a framework for Maker courses in upper grades that teach students creative process skills through three key Maker modes Imitation Modification and Innovation Educators will learn the differences between the three Maker modes their associated skill sets and gain concrete methods to teach document and assess these skills Through this approach teachers will enable students to apply them to different creative needs By focusing on how to teach skill development rather than merely how to build specific objects Three Modes of Making enables students to improve and enhance their creative skills and learn ways to apply them to a wide variety of challenges This book is a road map to developing the creative problem solvers that the world needs for the future
