Total Stakeholding: Leading stakeholder networks to sustainable success Jan Ruecker, 2012-04-26 Inhaltsangabe
Introduction Background of the topic and reason for its choice Initiation for the project To introduce this work the author refers to the World Economic Forum Annual Meeting 2011 which took place in Davos from the 26th to 30th of January 2011 its agendas and reports The World Economic Forum 2011 At first view this meeting looks like a get together of several leaders from different backgrounds meaning leaders from different industries as well as political and religious leaders But the huge amount of attendees and their position in the world turns this get together into a platform to discuss strategies and solutions for the world's future economy and how to overcome the latest issues regarding the financial crisis The theme of this year's meeting was Shared norms for a new reality indicating that the world has reached a turning point where change is important to assure a sustainable future Abhisit Vejjajiva Prime Minister of Thailand for example states Governments and businesses should start revising their social contracts with their stakeholders in the light of the new realities of the post crisis world Furthermore his concern is that today's leaders are mostly just focused on the short term success due to the high pressure from their shareholders and thus work in their own borders without caring about the common good outside the borders in order to generate sustainable success This concern gets a higher emphasis by Indra Nooyi Chairman and CEO of PepsiCo who actually attacks today's businesspeople and wants to send them back to university because they just aim for short term profits rather than worrying about a sustainable future In addition it is about the future leadership role of China considering multi stakeholders to achieve win-win solutions Victor Chu First Eastern Investment Group leadership for people Christine Lagarde French Minister of Finance and finally an optimistic outlook for the future especially Europe and the request of change and more transparency by David Cameron Prime Minister of the United Kingdom At the end buzzwords like stakeholders sustainability partnership social responsibility growth balance and responsible leadership just to name a few can be found throughout all statements As a matter of course all these statements are in a broader context meaning global issues but can easily be transferred to normal businesses Reason for this project Sustainability has **Achieving Organizational Excellence** Flevy Lasrado, 2018-05-01 This book bridges two essential aspects of assessing and achieving business excellence in 21st century organizations The author argues that transnational companies face a twofold challenge managing global knowledge networks and multicultural project teams on the one hand and interacting and collaborating across boundaries using global communication technologies on the other The author also argues that this dual challenge calls for the creation of a business excellence program that fits and thrives within these multicultural environments In response he reviews corporate practices in quality management and business excellence frameworks that have been extensively used on a transnational scale to drive organizational performance The book approaches quality management as an element that is no longer a choice but has now become a necessity if companies want to compete in highly globalized environments *Global*

Competitiveness Ajitabh,2008 Global Competitiveness is a combination of concepts case studies and practical ways on how to achieve and enhance competitiveness in any organisation Achieving and enhancing competitiveness will lead companies to achieve high level of excellence The book attempts to answer the What who when and how of Excellence i e what is excellence who are considered as excellent companies when a company is prepared to use tools frameworks and models to achieve excellence how strategic competitiveness can be enhanced using one of the most widely used tools viz Benchmarking Business cases from across the globe of different industries have been used to demonstrate how companies have achieved competitiveness and thus enhanced their long term competitive advantage to become excellent companies The book has three parts viz concepts business cases and tool for competitiveness Competitiveness has been widely used in companies but the understanding of the concept is not consistent across industry and academia For instance there are many models and frameworks across the globe which generally companies use for evaluating and enhancing their competitiveness Companies often tend to get drifted into the ocean of various models and frameworks and on one fine day adopt a model or framework only to repent after few quarters or years as the case may be It follows what is called operation successful but patient died syndrome Although all are good the judgment of applying which model framework and when is very critical This book throws light on how to choose and not choose various models and frameworks which generally depends on the company s maturity level context and most importantly inherent culture of the company This book has been designed in a way that it will help a reader to first understand the concept of competitiveness get an idea of what companies have been doing across the globe to become competitive and then how it can use tools such as benchmarking and other models frameworks to build and enhance their own competitiveness It has been written in a very simple language so that it can be easily read and applied as also can serve as a direction for prompting future thought processes in companies in their journey towards excellence
