Emerging Computer Technologies 2 Ömer Aydın, Radosveta Sokullu, Özkan Akın, Erginay Aslan, Oliver Simonoski, Ninoslav Marina, Natasa Paunkoska (Dimoska), Izabela Mitreska, Mustafa Ceyhan, Enis Karaarslan, 2022-12-31

There is rapid development and change in the field of computer science today. These affect all areas of life. Emerging topics in computer science are covered in this book. In the first chapter a specific IoT application called a smart mailbox with face recognition which uses cellular connectivity and image processing to securely deliver valuable documents. The prototype for this system includes a fingerprint reader, camera, electromagnetic lock and various other components connected to an Arduino Uno and a Raspberry Pi and uses OpenCV and Python software for face detection and recognition. In the second chapter authors compare and evaluate the main characteristics of 5G channels and the performance of two channel coding candidates: low density parity check LDPC codes and polar codes. The analysis considers block error rate, bit error rate, computational complexity and flexibility and finds that polar codes outperform LDPC code systems though LDPC is still a viable option compared to other code systems. The third chapter focuses on how to reliably process and store DNA sequences in EHR systems without any modifications. To achieve this the authors introduce a coding technique and evaluate its effectiveness using the Hamming code and Reed Solomon coding schemes on a sample data set. The results show that the Reed Solomon coding scheme outperforms the Hamming code in terms of error detection and correction for securely processing DNA records to EHR systems. The next chapter investigates the robustness of AI models trained on thyroid ultrasound images using different convolutional neural network CNN architectures VGG19, Xception, ResNet50V2 and EfficientNetB2 against adversarial attacks using the fast gradient sign method FGSM, basic iterative method BIM and projected gradient descent PGD techniques. In the fifth chapter it was questioned whether artificial intelligence could write an academic article. In this direction an academic article was created and evaluated by OpenAI ChatGPT. The final chapter proposes an application to measure RF signal intensities in urban areas and use that information to estimate the amount of energy that can be harvested from these signals. This information is then presented to users through a geographical information system.

El imperio de la IA Karen Hao, 2025-11-26 La fascinante historia de OpenAI y ChatGPT y del catastrófico destino al que nos pueden conducir. Con un acceso privilegiado a las personas más cercanas a Sam Altman, líder de OpenAI, Karen Hao descubre cómo esta organización se ha convertido en el epicentro de una industria tecnológica con poder y recursos sin precedentes. Así narra su frenética culminación en el sector y expone las enormes tensiones sociales y medioambientales que esta nueva era está generando.

OpenAI Solutions Ashok Brardwaj, 2024-03-13 Unlock the power of OpenAI and transform your ideas into intelligent applications with OpenAI Solutions. Transforming Ideas into Intelligent Applications. This comprehensive guide offers practical insights and strategies for leveraging OpenAI's innovative

technologies to build intelligent applications that drive business value Whether you re a developer entrepreneur or business leader this book provides actionable guidance on how to identify opportunities design solutions and deploy applications using OpenAI s APIs and tools From natural language processing to computer vision each chapter explores real world use cases and best practices for integrating OpenAI into your projects With step by step instructions and practical examples you ll learn how to harness the full potential of OpenAI and unlock new opportunities for innovation and growth

The Rise of Generative AI. Applications, Challenges, and Ethical Implications Fatlind Mazreku,2025-12-10 Scientific Study from the year 2025 in the subject Computer Sciences Artificial Intelligence language English abstract Generative Artificial Intelligence AI refers to algorithms and models capable of producing new content such as text images music or code that mimics or even rivals human creations Recent breakthroughs in model architectures e g transformers and the advent of large scale models like OpenAI s GPT 3 and DALL E have fueled an explosive growth in generative AI s capabilities and public adoption This paper provides an overview of generative AI s rise and its transformative impact across various fields We discuss key applications of generative AI in domains ranging from art and design to software development and medicine highlighting the innovative benefits it brings such as enhanced creative productivity and new problem solving tools At the same time we examine the challenges and ethical concerns emerging from generative AI s widespread use issues of bias misinformation intellectual property and misuse that have become increasingly urgent We also analyze the current technical limitations of generative AI including accuracy interpretability and resource demands and consider future outlooks for the technology The findings underscore that while generative AI offers unprecedented opportunities and innovations careful consideration of its ethical implications and proactive governance is essential to ensure it is developed and used responsibly In conclusion generative AI stands as a powerful tool that is reshaping creativity industry and society and its continued evolution will depend on balancing its benefits with diligent management of its risks

Co-Intelligence Ethan Mollick,2024-04-02 AN INSTANT NEW YORK TIMES BESTSELLER From Wharton professor and author of the popular One Useful Thing Substack newsletter Ethan Mollick comes the definitive playbook for working learning and living in the new age of AI Something new entered our world in November 2022 the first general purpose AI that could pass for a human and do the kinds of creative innovative work that only humans could do previously Wharton professor Ethan Mollick immediately understood what ChatGPT meant after millions of years on our own humans had developed a kind of co intelligence that could augment or even replace human thinking Through his writing speaking and teaching Mollick has become one of the most prominent and provocative explainers of AI focusing on the practical aspects of how these new tools for thought can transform our world In Co Intelligence Mollick urges us to engage with AI as co worker co teacher and coach He assesses its profound impact on business and education using dozens of real time examples of AI in action Co Intelligence shows what it means to think and work together with smart machines and why

it's imperative that we master that skill Mollick challenges us to utilize AI's enormous power without losing our identity to learn from it without being misled and to harness its gifts to create a better human future Wide ranging hugely thought provoking optimistic and lucid Co Intelligence reveals the promise and power of this new era

The Tao of Fundraising
John Kim, 2026-03-17 A masterclass in persuasion performance and psychology The Tao of Fundraising reveals how to navigate the invisible forces of human nature and capital flow to transform great ideas into fully funded ventures The Tao of Fundraising delivers a blunt but necessary truth the best ideas often go unfunded not because they're bad but because their creators don't understand how capital flows Fundraising is the most neglected art in modern business Most MBA courses and coaching advice focus on what to do after a business has secured investment The Tao of Fundraising seeks to fill that void No one understands fundraising like John Kim who has used these concepts to raise more than 70 billion over the course of his career Here he lays out all the concepts that allowed him to rise to the top of the fundraising world One part how to one part psychological study and one part spiritual guide The Tao breaks down the fundraising process and all the skills necessary to convince skeptical investors to place their money in your business To overcome a system designed to keep money out of reach and the natural hesitancy of investors you need The conceptual frameworks to understand how fundraising works in practice The practical processes that allow a fundraiser to sell their investment The psychological principles that enable a fundraiser to persuade skeptical investors to ignore their fears and trust the investment The performance skills to close the deal Drawing from ancient philosophy modern psychology economics and decades of frontline experience Kim reveals the deeper dynamics that drive fundraising at the highest level This isn't just a book about money it's a masterclass in human nature and the invisible forces that separate good ideas from funded ones
