Woo, Wow, and Win Thomas A. Stewart, Patricia O'Connell, 2016-11-29

In this pioneering guide, two business authorities introduce the new discipline of Service Design and reveal why trying new strategies for pleasing customers isn't enough to differentiate your business; it needs to be designed for service from the ground up. *Woo, Wow, and Win* reveals the importance of designing your company around service and offers clear, practical strategies based on the idea that the design of services is markedly different than manufacturing. Bestselling authors and business experts Thomas A. Stewart and Patricia O'Connell contend that most companies, both digital and brick-and-mortar, B2B or B2C, are not designed for service to provide an experience that matches a customer's expectations with every interaction and serves the company's needs. When customers have more choices than ever before, study after study reveals that it's the experience that makes the difference. To provide great experiences that keep customers coming back, businesses must design their services with as much care as their products. Service Design is proactive; it is about delivering on your promise to customers in accordance with your strategy, not about acceding to customer dictates. *Woo, Wow, and Win* teaches you how to create "Ahhh" moments when the customer makes a positive judgment and to avoid "Ow" moments when you lose a sale or worse, customer trust. Whether you're giving a haircut, selling life insurance, or managing an office building, your customer is as much a part of your business as your employees are.

Together you and customers create a bank of trust fueled by knowledge of each other's skills and preferences. This is Customer Capital, the authors explain, and it is jointly owned. But it's up to you to manage it profitably. Innovative yet grounded in real world examples, *Woo, Wow and Win* is the key strategy for winning customers and keeping them.

Why customer disengagement matters David Finken, 2016-09-20. Bachelor Thesis from the year 2016 in the subject Business economics. General grade 1.3 sehr gut. University of Bayreuth, language English. Abstract: Recently plenty of research was conducted on engagement, more particularly on enhancing Customer Engagement (CE). The flip side of CE, namely Customer Disengagement (CDE), seems to be uncharted. Thus, this thesis elaborates a working definition on CDE. This includes the interrelation of CE and CDE. According to this paper, CDE is described as a psychological process that can cause the state of complete detachment from a Brand or Service (B/S). CDE could have behavioural outcomes in terms of Negative Customer Engagement (NCE). Additionally, it interrelates with former CE levels and varies across contexts. CDE is supposed to be a promising research field.

Companies are able to save costs when it comes to promotion, improve services, and attract new customers easily. By analyzing the needs of customers, understanding shortfalls in business, which need to be corrected, and by listening to millions of bloggers worldwide, it becomes easier to create exactly what customer XY wants today. More than 100 million bloggers are communicating, sharing their experiences of products, services, and other topics. These bloggers have the power to influence ordinary people's decisions.
