

# Biological Classification

How are organisms grouped, sorted, and classified?

## Why?

From the time we begin to talk, we start to name things. We like to see how things are related. It is natural then, that biologists would name and organize organisms into a classification system. In this activity you will learn about the major classification groups and how organisms are named.

## Model 1 – Addressing an Envelope

Addressed Envelope 1

Addressed Envelope 2

1. According to the envelope in Model 1, who is supposed to receive the letter?
2. Decide with your group which of the two letters in Model 1 will be more successful at reaching its destination. Justify your choice.
3. In Addressed Envelope 1, which four letters (A–D) correspond to the most specific part of the address?
4. In Addressed Envelope 1, which four letters (A–D) correspond to the most general part of the address?
5. In recent years, the United States Post Office has introduced a zip code plus 4 (ZIP+4). Thinking about what you've learned about addresses, why would this additional information be added to address labels?
