Computer Performance Optimization Wolfgang W. Osterhage, 2014-07-08 Computing power performance was important at times when hardware was still expensive because hardware had to be put to the best use Later on this criterion was no longer critical since hardware had become inexpensive Meanwhile however people have realized that performance again plays a significant role because of the major drain on system resources involved in developing complex applications This book distinguishes between three levels of performance optimization the system level application level and business processes level On each optimizations can be achieved and cost cutting potentials can be identified The book presents the relevant theoretical background and measuring methods as well as proposed solutions An evaluation of network monitors and checklists rounds out the work
