content becomes a social form It is through sharing and exchanging musical compilations that the playlist as a social form serves as a vehicle or medium facilitating new forms of sociation and communication The communicative function of the playlist is due to its construction through emotions as uniquely subjective judgements based on the I as an emotional self feeling Thus musical compilations take part in the self construction process and can serve as a tool for the symbolic expression of the self Moreover the analysis points out that there are differences in how well certain parts of the self can be communicated by a playlist Emotional expressions of the self are translated into particular universal music patterns most successfully Furthermore the analysis shows that some people like to browse through the playlists of others and judge them thereupon which results in some type of musical voyeurism termed playlistism In conclusion I argue that the musical playlist is both socially implicated and socially implicating *Vanity Fair* ,2018 Prospect ,2009

Advisory services are considered to be the banks of the future Several interviews with companies working in this field have
been conducted to investigate if the algorithms are prepared for the next financial crash This work contains 7 chapters
starting with the motivation and research question Secondly the general situation on the market will be described including
the changes of customer behavior This serves the purpose to give an understanding about the current market conditions
Thirdly the banking sector will be described considering definitions and regulations In this work the focus will be on the
German market therefore consumer behavior and details about the German retail banking industry are relevant Sub
sequently chapter 4 deals with asset management and the new trends in the industry Chapter 5 describes the development of
the fintech industry Definitions and regulations of the fintech companies are part of this chapter In chapter 6 the scientific
investigation will be conducted and presented The results will show how stable the new technologies are in order to give an
outlook for the future in the next chapter Prospects for the future of retail banking and especially asset management will be
mentioned in chapter 7 General current trends and forecasts are also part of this chapter Since only limited literature is
available about the fintech industry and especially robo advisory the investigation part includes a qualitative approach with
interviews that have been conducted with qualified specialists that work or research in the robo advisory industry The
question of whether and how the robo advisors will survive the next financial crisis is topic of the interviews There has been
no financial crisis that might have caused unforeseen problems for the systems ever since the creation of robo advisory Thus
it is unknown how those technologies will react to chaotic market situations The idea was to ask companies to what extent
they are prepared for a financial crisis The findings of this investigation will deal with the possible future outline of those
fintechs providing algorithm based asset management The question about the security framework has been answered with a
view to examining the future development of the robo advisory industry **The 10th International Conference on
