social value thus mere musical content becomes a social form It is through sharing and exchanging musical compilations that the playlist as a social form serves as a vehicle or medium facilitating new forms of sociation and communication The communicative function of the playlist is due to its construction through emotions as uniquely subjective judgements based on the I as an emotional self feeling Thus musical compilations take part in the self construction process and can serve as a tool for the symbolic expression of the self Moreover the analysis points out that there are differences in how well certain parts of the self can be communicated by a playlist Emotional expressions of the self are translated into particular universal music patterns most successfully Furthermore the analysis shows that some people like to browse through the playlists of others and judge them thereupon which results in some type of musical voyeurism termed playlistism In conclusion I argue that the musical playlist is both socially implicated and socially implicating **Vanity Fair** ,2018 Prospect ,2009

How to Get on Podcasts: Cultivate Your Following, Strengthen Your Message, and Grow as a Thought Leader through Podcast Guesting Michelle Glogovac,2024-02-27 How to leverage podcast guesting to elevate yourself as a thought leader generate more revenue and promote your business all for little to no cost The explosion of social media AI enabled online advertising and the overall cacophony of the internet has made it harder than ever to connect a message with an audience One of the most powerful emerging tools for cutting through that noise is being a guest on podcasts or podcast guesting Michelle Glogovac aka The Podcast Matchmaker™ knows the impact podcast guesting has on business and brand growth She helps entrepreneurs nonprofit leaders activists experts and authors promote themselves their businesses organizations stories and expertise via podcast interviews In How to Get on Podcasts she teaches you how to Create unique speaking topics without being generic Define your ideal audience Design branded media kits Establish your expertise and knowledge Share yourself freely without resorting to sales tactics Tell compelling stories Repurpose your interviews into evergreen marketing content Turn every interview into a valuable business opportunity There are more than two million podcasts out of which 500 000 host expert guests a huge opportunity for leveraging a free and robust marketing tool if you have the know how With How to Get on Podcasts you have everything you need to increase business boost your career and brand and elevate your thought leadership potential **Impact of context-aware recommender systems on habitual listening patterns** ,2017-11-21 Seminar paper from the year 2017 in the subject Musicology Miscellaneous grade 1 0 language English abstract With the ubiquitous availability and rapid travelling of information networked media environments confront consumers with an abundance of information which they can not handle by themselves As consequence of that digital media platforms such as Spotify make use of recommender systems that suggest items based on anticipated user preferences Thereby algorithms assist users to navigate huge databases of items Recommender systems turn out to be one of the most powerful tools to cope with information overload On the other hand digital music platforms afford user with new opportunities to add share comment or rank items and thus facilitate the formation of participatory music communities However very little is known

Master s Thesis from the year 2019 in the subject Business economics Banking Stock Exchanges Insurance Accounting grade  
1 3 Berlin School of Economics and Law language English abstract The purpose of this work was to find out whether Fintechs  
are able to compete with Banks in the field of Asset Management Companies providing Robo Advisory services are  
considered to be the banks of the future Several interviews with companies working in this field have been conducted to  
investigate if the algorithms are prepared for the next financial crash This work contains 7 chapters starting with the  
motivation and research question Secondly the general situation on the market will be described including the changes of  
customer behavior This serves the purpose to give an understanding about the current market conditions Thirdly the banking  
sector will be described considering definitions and regulations In this work the focus will be on the German market  
therefore consumer behavior and details about the German retail banking industry are relevant Subsequently chapter 4  
deals with asset management and the new trends in the industry Chapter 5 describes the development of the fintech industry  
Definitions and regulations of the fintech companies are part of this chapter In chapter 6 the scientific investigation will be  
conducted and presented The results will show how stable the new technologies are in order to give an outlook for the future  
in the next chapter Prospects for the future of retail banking and especially asset management will be mentioned in chapter 7  
General current trends and forecasts are also part of this chapter Since only limited literature is available about the fintech  
industry and especially robo advisory the investigation part includes a qualitative approach with interviews that have been  
conducted with qualified specialists that work or research in the robo advisory industry The question of whether and how the  
robo advisors will survive the next financial crisis is topic of the interviews There has been no financial crisis that might have  
caused unforeseen problems for the systems ever since the creation of robo advisory Thus it is unknown how those  
technologies will react to chaotic market situations The idea was to ask companies to what extent they are prepared for a  
financial crisis The findings of this investigation will deal with the possible future outline of those fintechs providing  
algorithm based asset management The question about the security framework has been answered with a view to examining  
the future development of the robo advisory industry [The 10th International Conference on Science and Technology](#)
