Product Structure Symbols

Product1

A product. For more information, refer to Insert a New Product in *Product Structure User's Guide*.

Product2

A component or sub-product. For more information, refer to Insert a New Component in *Product Structure User's Guide*.

Flexible_product

The purple little wheel to the left corner of the CATProduct icon and the light bar  identify a flexible sub-assembly. For more information, refer to Soft Sub-Assemblies in *Product Structure User's Guide*.

Part.1

Instance of a part. This symbol  means that there is a geometrical representation of the part and that it is activated.

Part_with_DeactivatedRepresentation

The representation of this part is deactivated. This symbol means the geometric representation is deactivated. Before opening a document, you choose the activate or deactivate Shape representation in Tools->Options->Infrastructure, select the Product Structure tab and check the box entitled Do not activate default shapes on open. For a particular instance in the document, you can deactivate or activate it by selecting the Representations -> Deactivate Node / Activate Node contextual commands. The representation of this component is deactivated.

Component_with_DeactivatedRepresentation

Contextual parts:

For contextual parts, the reference keeps a link with the Original or Definition Instance (or Original Part).

For each parts, every instance keeps a link with its reference. But the Contextual Reference (or Contextual Part) has only one link, with a single instance which is contextual. This unique link allows you to know the name of the document (CATProduct) on which the part 's external

BIM Handbook Rafael Sacks, Ghang Lee, Luciana Burdi, Marzia Bolpagni, 2025-03-25 Understand the latest advances in BIM with this fully updated guide Building Information Modeling BIM has become an increasingly central component of architecture and the building trades Modern BIM software has moved beyond the simple 2D and 3D modeling tools of the past to incorporate simulation analysis project management and more BIM Handbook A Guide to Building Information Modeling for Owners Designers Engineers Contractors and Facility Managers has long served as the essential introduction to this subject and its ever expanding applications Now fully updated to reflect the increasing standardization of BIM practices and its cutting edge industry frameworks the latest edition of this key text remains the fundamental tool for understanding the backbone of innovation in construction technology Readers of the fourth edition of BIM Handbook will also find Expanded treatment of the owner s perspective in BIM and BIM integration Detailed discussion of new industry specific frameworks such as ISO 19650 Exploration of the relationship between BIM and digital twins for construction operations and maintenance BIM Handbook is ideal for any professionals in the building trades including owners and operators of buildings architects engineers contractors fabricators developers of BIM software and more *Methods and Tools for Efficient Model-Based Development of Cyber-Physical Systems with Emphasis on Model and Tool Integration* Alachew Mengist, 2019-08-21 Model based tools and methods are playing important roles in the design and analysis of cyber physical systems before building and testing physical prototypes The development of increasingly complex CPSs requires the use of multiple tools for different phases of the development lifecycle which in turn depends on the ability of the supporting tools to interoperate However currently no vendor provides comprehensive end to end systems engineering tool support across the entire product lifecycle and no mature solution currently exists for integrating different system modeling and simulation languages tools and algorithms in the CPSs design process Thus modeling and simulation tools are still used separately in industry The unique challenges in integration of CPSs are a result of the increasing heterogeneity of components and their interactions increasing size of systems and essential design requirements from various stakeholders The corresponding system development involves several specialists in different domains often using different modeling languages and tools In order to address the challenges of CPSs and facilitate design of system architecture and design integration of different models significant progress needs to be made towards model based integration of multiple design tools languages and algorithms into a single integrated modeling and simulation environment In this thesis we present the need for methods and tools with the aim of developing techniques for numerically stable co simulation advanced simulation model analysis simulation based optimization and traceability capability and making them more accessible to the model based cyber physical product development process leading to more efficient simulation In particular the contributions of this thesis are as follows
1 development of a model based dynamic optimization approach by integrating optimization into the model development

process 2 development of a graphical co modeling editor and co simulation framework for modeling connecting and unified system simulation of several different modeling tools using the TLM technique 3 development of a tool supported method for multidisciplinary collaborative modeling and traceability support throughout the development process for CPSs 4 development of an advanced simulation modeling analysis tool for more efficient simulation

CATIA V5 FEA Tutorials Release 20 Nader G. Zamani,2011 The objective of this tutorial book is to expose the reader to the basic FEA capabilities in CATIA V5 Release 20 The chapters are designed to be independent of each other allowing the user to pick specific topics without the need to go through the previous chapters However the best strategy to learn is to sequentially cover the chapters In this workbook the parts created in CATIA are simple enough they can be modeled with minimal knowledge of this powerful software The reason behind the simplicity is not to burden the reader with the CAD aspects of the package However it is assumed that the user is familiar with CATIA V5 Release 20 interface and basic utilities such as pan zoom and rotation The tutorials are based on release 20 however other releases can also be used with minor changes Typically the differences are not even noticed by a beginner
