Why regulation of gene expression?

- Pulling it all together
 - Transcription starts at the transcription start site
 - Going to be given
 - Rna polymerase binds to the TSS
 - Reading 3' to 5'
 - Information is in the order of the bases
 - mRNA is made 5' end first
 - Translation starts at the start codon
 - Not usually right at the beginning of the 5' end
 - Becomes the 5' untranslated region
 - Start codon is where the ribosome binds
 - Stop codons dictate where translation stops
 - Doesn't have to be right at the end
 - 3' untranslated region
 - End with a polypeptide
 - Made of amino acids
 - Peptide bonds
 - N terminus made first
 - C terminus made last
- Regulation
 - Refers to the ability of cells to control their level of gene expression
 - Would be wasteful for all to be expressed all the time
 - Majority of genes regulated to ensure that gene products are produced at the correct time and in appropriate amount
 - Why?
 - Saves energy in the cell
 - By producing specific gene product only when needed
 - Not all genes are regulated
 - Constitutive genes have essentially constant levels of expression
 - Prokaryotes
 - Transcription and translation take place at the same time
 - Eukaryotes
 - Transcription first
 - Nucleus
 - Processing of the mRNA
 - Introns removed
 - Exons spliced together
 - Cap added on 5' end
 - Stability/ signal
 - Poly-a tail added on 3' end
 - Stability/ signal
 - Translation
 - Finished proteins
 - Pathway regulation
 - Feedback inhibition
 - Allosteric inhibition
 - Ex: negative regulation
 - When tryptophan accumulates it will turn off the pathway
 - Acts as the inhibitor
 - Regulation of gene expression
 - Doesn't produce the enzyme
 - Far more effective
 - Doesn't need to transcribe/ processed/ translated
 - Eukaryotes
 - Cell differentiation
 - Dependent on fine-tuning of gene expression

The Biology of Epithelial Cell Populations Nicholas A. Wright, Malcolm Alison, 1984 This book brings together in a critical study current research on epithelial cell populations It sets out to analyse the principles by which epithelial cell populations are organized in terms of the function of their component populations The approach is both descriptive and operational giving special emphasis to epithelial cell lineages three dimensional organization methodology for measuring epithelial cell population sizes and proliferative rates epithelial stem cell populations growth reactions response to cytotoxic insult carcinogenesis and epithelial growth control The book is directed primarily at those who are interested in the organization of proliferating and differentiating tissue systems in terms of their contained cell lineages There are many lessons in epithelia for those studying growth control since they are in many situations ideal models upon which to test general ideas and concepts The authors also indicate the most important new research areas and provide advice on the practical approach to problems in epithelial cell proliferation and its control

Teacher's Wraparound Edition: Two Biology Everyday Experience Albert Kaskel, 1994-04-19 *The Sceptical Optimist* Nicholas Agar, 2015-07-09 The rapid developments in technologies especially computing and the advent of many smart devices as well as rapid and perpetual communication via the Internet has led to a frequently voiced view which Nicholas Agar describes as radical optimism Radical optimists claim that accelerating technical progress will soon end poverty disease and ignorance and improve our happiness and well being Agar disputes the claim that technological progress will automatically produce great improvements in subjective well being He argues that radical optimism assigns to technological progress an undeserved pre eminence among all the goals pursued by our civilization Instead Agar uses the most recent psychological studies about human perceptions of well being to create a realistic model of the impact technology will have Although he accepts that technological advance does produce benefits he insists that these are significantly less than those proposed by the radical optimists and aspects of such progress can also pose a threat to values such as social justice and our relationship with nature while problems such as poverty cannot be understood in technological terms He concludes by arguing that a more realistic assessment of the benefits that technological advance can bring will allow us to better manage its risks in future
