Determinants of Achievement in Top Sport Matej Maksimiljan Tusak, Tiziano A. Agostini, Donatella Di Corrado, 2026-03-05 Success in competitive sports depends primarily on athletes skills personality and motivation Many studies have investigated the determinants of success The presence of the zeitgeist social cognitive perspective in psychology has shifted the focus to motivation in top sports Social cognitive approaches have become the primary framework for researching almost everything in psychology Despite extensive discussion and research on the relationship between motivation and personality characteristics there is still a lack of evidence connecting psychological preparation pre competitive states and psychological techniques to sports success and efficiency There is still a gap in determining which psychological approaches and mental techniques contribute to success in top sports Different regression models are expected to explore the determinants of success by comparing males and females as well as young athletes versus top athletes The final formula for success is still

undefined regarding the importance of pre competitive states psychological preparation technical skills and knowledge Techniques of psychological preparation such as hypnosis visualization or cognitive stress coping techniques are not clearly defined and discussed Therefore addressing this gap is crucial The following goals should be discussed Psychological factors contributing to success in top sports motivational variables contributing to success in top sports personality structures contributing to top achievements stress and coping strategies in top sports the use of psychological preparation and its relation to top achievement in sports evidence based research on specific psychological preparation techniques and their effectiveness in helping athletes achieve top performances pre competition states and their relation to success in top sports differences in psychological characteristics contributing to top achievements between males and females and between youth athletes and top athletes important factors in the development of motivation for success in athletes ethics and strategies to emphasize fair play in top sports the era of COVID 19 and its relationship to success in top sports including correlation with specific psychological factors Researchers are invited to submit original research to contribute to this topic We also welcome brief research reports systematic reviews and meta analyses reviews and theoretical articles By understanding the factors contributing to success in top athletes we can develop strategies to improve their results and effectiveness

Rhetoric of Masculinity Donnalyn Pompper, 2022-01-31 Rhetoric of Masculinity Male Body Image Media and Gender Role Stress Conflict lends depth and global nuance to discourse associated with the masculinity concept as it brings to bear on males self image role in society media representations of them and the gender role stress conflict experienced when they fail to measure up to social standards associated with what it means to be manly Even though the concept of masculine gender role stress conflict has received

substantial scholarly attention in psychology social learning effects of masculinity as it plays out in media warrant further study given that representations offer audiences restrictive male gender roles that may contribute to toxic masculinity Men and boys are taught to be self sufficient to act tough to be muscular heterosexual and to use aggression to resolve conflicts Such contexts provide restrictive images that can result in self harm and an inflexible social milieu Scholars and students of communication rhetoric and gender studies will find this book particularly interesting **Mediaweek** ,2010-04
