From Cooking Vessels to Cultural Practices in the Late Bronze Age Aegean Julie Hruby, Debra Trusty, 2017-08-31 Late Bronze Age Aegean cooking vessels illuminate prehistoric cultures foodways social interactions and communication systems While many scholars have focused on the utility of painted fineware vessels for chronological purposes the contributors to this volume maintain that cooking wares have the potential to answer not only chronological but also economic political and social questions when analysed and contrasted with assemblages from different sites or chronological periods The text is dedicated entirely to prehistoric cooking vessels compiles evidence from a wide range of

Greek sites and incorporates new methodologies and evidence. The contributors utilise a wide variety of analytical approaches and demonstrate the impact that cooking vessels can have on the archaeological interpretation of sites and their inhabitants. These sites include major Late Bronze Age citadels and smaller settlements throughout the Aegean and surrounding Mediterranean area including Greece, the islands, Crete, Italy and Cyprus. In particular, contributors highlight socio-economic connections by examining the production methods, fabrics and forms of cooking vessels. Recent improvements in excavation techniques, advances in archaeological sciences and increasing attention to socioeconomic questions make this an opportune time to renew conversations about and explore new approaches to cooking vessels and what they can teach us.

Pottery Southwest, 1984. *International Symposium on East Anatolia—South Caucasus Cultures*. Mehmet Işikli, Birol Can, Mehmet Işikli, 2015-09-04. The Southern Caucasus is a region of great historical, cultural and strategic importance which means that it has become an indispensable research field for most of the social sciences, particularly archaeology. However, despite its rich potential, research in the areas of modern-day Georgia, Armenia, Azerbaijan, Nakhichevan, North-western Iran and North-eastern Turkey has been inadequate when compared with other important culture basins such as Mesopotamia and the Mediterranean. In October 2012, Atatürk University in Erzurum, North-eastern Anatolia, Turkey, with the patronage of the Eurasian Silk Road Universities Consortium (ESRUC) hosted a Symposium of academics from more than 120 science and education institutions around the world to discuss opinions and share information about cultures in this region from its earliest times to the Middle Ages within the scope of Ancient History, Archaeology, Art History and Ethno-archaeology. This two-volume publication is a compilation of 75 articles which were evaluated and selected by an Academic Committee from contributors who presented their academic papers at the Symposium. **The Kiva**, 1997.

This book includes papers presented at a session of EAA 97 spanning from the Palaeolithic to modern times and address various aspects of material culture including pottery, stone tools, beads, metals and architecture. The papers reflect the widespread interest which has arisen in the last decade in the social agency of ancient material culture production and they make a valuable contribution to the development of the theoretical foundations of the study of ancient technology.
