

# Physical Security Measures

Creating a robust physical security plan is vital for any organisation.

## EXTERNAL AREAS

The first barrier to entry of your property is the external areas. Don't make it easy for unwanted guests to access your premises - but don't give them easy hiding spots either. Putting up perimeter walls, security gates, motion sensor lighting, grille gates and CCTV makes your building more secure from intruders.

## ACCESS CONTROL

Control who can get in and out of your building by having access control methods at each of your exits and entrances. Whether fob, key or card, an access control system makes it much harder for unwanted guests accessing your building. Installing an access control system can reduce the possibility of opportunist theft and damage.

## CCTV & ALARMS

CCTV & Alarms work well to deter unauthorised activity and access to your building. Should the worst happen, CCTV plays a major part in the catching of unauthorised persons, whilst alarms quickly notify the authorities to any break ins.

## ASSET PROTECTION

Important documents, equipment and cash need to be stored in a safe and secure location to reduce the chances of them being stolen or removed by unauthorised personelle. Investing in a safe, lockable cabinet and padlocks to lock valuables away and equipment down ensure you protect your valuables.

## FIRE PROTECTION

Fire can have a devastating effect on your business. If things like important documents and data got destroyed, how would your business cope? Investing in fireproof safes and cabinets, fire alarm systems and response systems will give you the business the protection you need.

## RESPONSE PLAN

No physical security plan would be complete without a response plan in place. Consider implementing guards on particular secure areas and hook up your alarm systems to notify the authorities of a breach.

# Physical Security And The Inspection Process
