The Developing Person Through the Life Span Kathleen Stassen Berger, 2005 The *The Developing Person Through the Life Span* Sixth Edition presents theory research practical examples and policy issues in a way that inspires students to think about human development and about the individual s role in the community and the world Review the new edition and you ll find Berger s signature strengths on display the perceptive analysis of current research the lively and personal writing style and the unmistakable commitment to students You ll also find a wealth of new topics plus a video based Media Tool Kit that takes the teaching and learning of human development to a new level Parenting a Happy Child Peter Claver Ugo, 2018-10-19 A Latin adage says *Dat quod non habet* meaning No one gives what he does not have This wise saying makes sense in the business of parenting We are in an age where children are begetting children due to lack of knowledge which contributes to rampant teenage pregnancy It gets complicated when a teenager who should still need parental care becomes a parent This book examines some of the fundamental precautions that should be taken from the moment of conception such as the effects of toxins or teratogens that could affect the health of the baby in the womb Every parent who has the good of their baby in the womb in mind should know about these toxins and avoid putting them into their body The

fundamentals to parenting with resilience and grace lies in the sacred nature of the human body as presented in this book Any form of physical and emotional abuse or addiction to alcohol and substances of abuse that can pose danger to the unborn baby or a child should be avoided The need for the parents to form a secure attachment with the baby cannot be underestimated as insecure attachment could result to lifelong emotional and psychological imbalance in the child if not properly addressed This book also seeks to emphasize that no two persons are ever the same not even identical twins Therefore the former idea in parenting that tends to say that one size fits all is untenable when it comes to raising a child who can live true to his or her nature I have in this book explored the various traits and energy movements that could inform the personality of your child and offer best practice tips to raise each child to be happy and successful Many behavioral warning signs that could show when the child is not properly being raised or abused are discussed Finally some measures that could be taken to arrest the effects of poor parenting and healing of a traumatized inner child are equally presented It is my sincere hope that many will find this book a good guide and reference book in raising their children

children's school readiness school children's academic skills adolescents vocational skills adult farmers agricultural extension courses or older adults understanding of health literacy campaigns Research in many disciplines is required to make progress in formal and informal education on low and middle income countries and formal and informal education is relevant to the key areas of interest in many disciplines Therefore this Research Topic invites submissions from researchers in psychology e.g. attitudinal factors affecting access lived experience and outcomes of students in primary secondary and tertiary education education e.g. effective pedagogies in low resource settings nutrition e.g. the effects of protein energy or micronutrient malnutrition on learning linguistics e.g. challenges in teaching literacy skills in tonal languages public health e.g. relationship between access to menstrual sanitation in schools and girls school attendance the efficacy of public education campaigns concerning female genital cutting anthropology e.g. Indigenous concepts about learning and knowledge In addition regardless of their discipline we welcome submissions concerning formal or informal education in but not limited to special populations e.g. retraining programs for former child soldiers informal learning by children of sex workers and street involved children parenting classes to support the development of children affected by tropical diseases such as Zika virus and cerebral malaria cultural issues e.g. interventions to improve educational equity for students from low castes the relationship between child marriage and educational equity for girls Due to the nature of this collection the Topic Editors are requesting that one author of each paper is a resident in a low or middle income country Types of manuscripts Original quantitative and qualitative empirical research Narrative and meta-analytic systematic reviews Evaluations of the implementation or effectiveness of interventions or policies Development of culturally and contextually appropriate measures and research methods
