**American Turner**, 1924 **Text, Speech and Dialogue** Petr Sojka, Ivan Kopecek, Karel Pala, 2003-08-02 The Text  
Speech and Dialogue TSD Conference 2002 it should be noticed is now being held for the fifth time and we are pleased to  
observe that in its short history it has turned out to be an international forum successfully intertwining the basic fields of NLP  
It is our strong hope that the conference contributes to a better understanding between researchers from the various areas  
and promotes more intensive mutual cooperation So far the communication between man and computers has displayed a one  
way nature humans have to know how the machines work and only then can they understand them The opposite however is still  
quite far from being real our understanding of how our user friendly computers can understand us humans is not deep  
enough yet A lot of work has to be done both in the near and distant future Let TSD 2002 be a modest contribution to this  
goal The conference also serves well in its second purpose to facilitate researchers meeting in the NLP field from Western and  
Eastern Europe Moreover many participants now come from other parts of the world thus making TSD a real  
crossroads for researchers in the NLP area This volume contains the proceedings of this conference held in Brno September 9-12  
2002 We were honored to have as keynote speakers James Pustejovsky from Brandeis University and Ronald Cole from the  
University of Colorado We would like to thank all the Program Committee members and external reviewers for their  
conscientious and diligent reviewing work *The Librarian's Introduction to Programming Languages* Beth  
Thomsett-Scott, 2016-06-21 The Librarian's Introduction to Programming Languages presents case studies and practical  
applications for using the top programming languages in library and information settings While there are books and Web  
sites devoted to teaching programming there are few works that address multiple programming languages or address the  
specific reasons why programming is a critical area of learning for library and information science professionals There are  
many books on programming languages but no recent items directly written for librarians that span a variety of programs  
Many practicing librarians see programming as something for IT people or beyond their capabilities This book will help these  
librarians to feel comfortable discussing programming with others by providing an understanding of when the language  
might be useful what is needed to make it work and relevant tools to extend its application Additionally the inclusion of  
practical examples lets readers try a small app for the language This also will assist readers who want to learn a language  
but are unsure of which language would be the best fit for them in terms of learning curve and application Languages  
covered are JavaScript PERL PHP SQL Python Ruby C++ Java This book is designed to provide a basic working knowledge of each  
language presented case studies which show the programming language used in real ways and resources for exploring each  
language in more detail Natural science, 1898 **The National Union Catalog, Pre-1956 Imprints**, 1968 Current
