Metadone - Correct Answer the only long-acting full opioid agonist approved for treatment, at this time. It provides a range of effects similar to those of short-acting opiates like Heroin and Morphine, suppressing withdrawal symptoms and avoiding cravings as the opioid is eliminated from the body. Dose needed for cross-tolerance depends on client's level of tolerance for the drug(s).

Trauma-informed treatments - Correct Answer This treatment approach should minimize the risk of re-traumatization or replicating prior trauma dynamics. Ex: Clients may express feelings of powerlessness or being trapped if they are not active involved in treatment decisions or if providers mirror specific behaviors/dynamics from client's past traumatic experiences.

Screening - Correct Answer The first two steps in in this process are to determine whether the client as a history of trauma and whether he/she has trauma related symptoms.

Screening - Correct Answer Often the first contact between client and treatment providers, this interaction can set the tone of treatment and being the relationship with the client.

Assessment - Correct Answer When a client screens positive for substance abuse, trauma-related symptoms, or mental health disorders, the counselor should follow up with a comprehensive _____

Assessment - Correct Answer This process should reoccur throughout treatment, to provide valuable information and details as client's trust in staff members grow and progress occurs.

CBT - Correct Answer Most PTSD and SA models involve _____ that integrates cognitive and behavioral theories by incorporation two ideas: that thoughts mediate between situational demands and one's attempts to effective respond and that behavioral change influences acceptance of altered cognition about oneself or a situation and establishment of newly learned patterns
