complex and require an understanding of the ecology of the disease and how these interact in space and time. Knowing where and when diseases are prevalent, who is affected, and what may be driving these outcomes is important for determining how to respond. In reality, we all would like to be healthy and live in healthy places. In this book, epidemiology and public health are integrated with spatial data science to examine health issues in dynamically changing environments. This is too broad a field to be completely covered in one book, and so it has been necessary to be selective with the topics, methods, and examples used to avoid overwhelming introductory readers while at the same time providing sufficient depth for geospatial experts interested in health and for health professionals interested in integrating geospatial elements for health analysis. A variety of geographic information, some novel, some volunteered, some authoritative, some big and messy, is used with a mix of methods consisting of spatial analysis, data science, and spatial statistics to better understand health risks and disease outcomes.

**Key Features:** Makes spatial data science accessible to health; Integrates epidemiology and disease ecology with spatial data science; Integrates theoretical geographic information science concepts; Provides practical and applied approaches for examining and exploring health and disease risks; Provides spatial data science skill development ranging from map making to spatial modelling.

*Very Slowly All at Once* Lauren Schott, 2026-01-20. A propulsive and wickedly entertaining debut thriller for fans of Laura Dave and Ashley Elston that explores the dark underside of the American dream about a couple whose financial problems are seemingly answered when they begin receiving growing sums of money from an unknown source, a windfall that will carry an unthinkable price. Mack and Hailey Evans have worked hard to achieve their upper middle class life: promising careers, two beautiful children, and a brand new house in the exclusive lakefront village of Bratenahl, Ohio. Not that everything's perfect: aging parents' problems at work and even the upkeep on that gorgeous house have been causing these two increasing amounts of worry. When a small check appears in the mailbox from a mysterious company named Sunshine Enterprises, Mack assumes it's from his wealthy estranged father trying to buy his way back into their lives. Though he'd rather rip it up, Mack deposits the needed funds. To his surprise, the checks keep coming, each for a larger amount, larger than the last. When Hailey finds out what's going on, she has her own suspicions about the provenance of the payments. Despite growing uncertainty over the identity of their benefactor, Mack and Hailey keep taking the money. After all, there are bills to pay. It is a choice with dark repercussions, as the couple soon learns the hard way that nothing in life is free. Suddenly, the Evans find themselves in a harrowing arrangement with someone who will stop at nothing to get a return on their investment.

But since then new platforms have emerged others have become less relevant and algorithms are incentivizing new styles of content. New skills are necessary to create advertising that builds brand and sales. In his latest book Vaynerchuk argues that today's fast growing businesses brands content creators and influencers have one thing in common.
