Algorithms and Data Structures Pat Morin, Subhash Suri, 2023-07-27 This book constitutes the refereed proceedings of the 18th International Symposium on Algorithms and Data Structures WADS 2023 held during July 31 August 2 2023 The 47 regular papers presented in this book were carefully reviewed and selected from a total of 92 submissions They present original research on the theory design and application of algorithms and data structures **Using Additional Information in Streaming Algorithms**

Raffael Buff, 2016-12 Streaming problems are algorithmic problems that are mainly characterized by their massive input streams Because of these data streams the algorithms for these problems are forced to be space efficient as the input stream length generally exceeds the available storage The goal of this study is to analyze the impact of additional information more specifically a hypothesis of the solution on the algorithmic space complexities of several streaming problems To this end different streaming problems are analyzed and compared The two problems most frequent item and number of distinct items with many configurations of different result accuracies and probabilities are deeply studied Both lower and upper bounds for the space and time complexity for deterministic and probabilistic environments are analyzed with respect to possible improvements due to additional information The general solution search problem is compared to the decision problem where a solution hypothesis has to be satisfied Computing and Combinatorics

Lusheng Wang, 2005-08-04 The refereed proceedings of the 11th Annual International Computing and Combinatorics Conference COCOON 2005 held in Kunming China in August 2005 The 96 revised full papers presented together with abstracts of 3 invited talks were carefully reviewed and selected from 353 submissions The papers cover most aspects of theoretical computer science and combinatorics related to computing and are organized in topical sections on bioinformatics networks string algorithms scheduling complexity steiner trees graph drawing and layout design quantum computing randomized algorithms geometry codes finance facility location graph theory graph algorithms *Automata, Languages and Programming*
