If the moon's spin is tidally-locked so that it's synchronized with its rotational rate (causing it to almost always look the same from Earth), once humans colonize the moon, will the lunar inhabitants experience "day" and "night" on the moon? r/askscience
Astronomy

I was thinking earlier if lunar colonization might cause there to be a need for lunar time zones, but then I started thinking more about how the same part of the moon always faces us. So, I got to reading about how the moon spins on its axis, but the tidal bulge slowed its rotation to eventually make it look like it's the same part facing us. Would that experience be the same on the surface of the moon? Forgive my ignorance. My one regret about my education (I'm 48) is that I never took physics or astronomy. Thank you in advance.

The Moon's rotation is indeed synced with its orbit, which is why it always faces Earth with the same face. But that still means that it is rotating! It takes the Moon about a month to rotate about its axis, relative to the Sun. So if you're on the Moon, you do have a day/night cycle, it's just about 2 weeks of daylight, followed by 2 weeks of night. The Sun will rise, move across the sky, and set, over the course of 2 Earth weeks. However, the Earth will always be in the same fixed position in the sky, and will only move if you move to a different position on the Moon (if you're on the far side

The Hidden Psychology of Social Networks: How Brands Create Authentic Engagement by Understanding What Motivates Us Joe Federer,2020-09-15 From the former Head of Brand Strategy at Reddit comes a proven and thought provoking approach to the digital economy

and how brands can create authentic engagement that is rooted in the fundamental motivations behind human psychology. Leading marketing practitioner and thought leader Joe Federer draws on evolutionary biology, anthropology, neuroanatomy, and psychology as well as more than a decade of hands-on experience to explain why people act so differently in various online spaces and what they are seeking from participating in each one. With a framework based on Freud's Id, Ego, and Superego model of the human psyche, he demonstrates how the internet is a digital reflection of the collective human psyche and how different social networks correspond to different mindsets: platforms like Reddit to the unfiltered Id, Facebook and Twitter to the managed Ego, and Instagram to the ideal Superego. In the same way you behave differently when you're home alone, out with friends, communicating with family, or interacting with coworkers, people act and express themselves differently in these various online spaces. Context matters. Understanding this will enable you to develop and execute effective engagement strategies to reach your target audiences on each social network. Learn how to create content that drives sharing and word of mouth, how brands can fit natively into different types of social channels, how to balance branded social presences across different networks, why authenticity will only grow in importance to consumers. Fascinating and deeply compelling. *The Hidden Psychology of Social Networks* will equip you to make vastly more efficient use of your media buys, establish more thoughtful strategies, develop better creative, and in the end deliver more effective marketing that provides value.
