The Platinum Workforce Trond Arne Undheim, 2025-11-25 Artificial intelligence is already causing a major shift in the nature of work Countries colleges or employers are not prepared to continuously train billions of knowledge workers to compete in this new economic reality But that's not all More change is coming due to the polycrisis of pressing challenges such as sustainability social inequality and geopolitical instability Figuring out what career paths skills and talents we need to nurture has never been more urgent especially for those who aspire to leadership In The Platinum Workforce futurist and technologist Trond Arne Undheim reveals how to be a changemaker in the ongoing re industrial transition Industrial principles such as lean manufacturing technological advancement and production at scale meet significant sustainability challenges increased risks and intricate inequality concerns from the Global South as well as from workers in advanced societies who also feel left behind Undheim has spent the last decade examining the technologies risks and trends shaping the future of work Helping startups shaping governance policies teaching students and building educational programs he has found that there are two core skills and ten complementary skills that will define both individual and collective success in the future of work The core skills are deft human AI collaboration and an innate interoperability mindset but teams together mastering the ten complementary skills eco awareness maker skills mediation skills megascale operations mobility risk aptitude R D hacks psycho resilience sociotechnical finesse and systems thinking is what will define future leadership Leading the 21st century workplace will

require unprecedented levels of human AI collaboration But evolving new forms of augmented intelligence will not be easy We all have to train for it constantly adapting to new interfaces and watching out for risks that could derail progress or create new problems But the challenge does not stop there Tackling the cascading effects of evolving hazards requires astute risk management Transdisciplinary skills such as an entrepreneurial approach megascale execution ability and socio technical skills will need to be constantly honed Leaders and workers alike need to develop an interoperability mindset Success requires adapting to and helping others adapt to the fundamental shifts in the materials methods tools and technologies fueling the intricate cultural machine we call society No matter our degrees experiences resources or current skill sets to compete in this new world we need a reset

Educational Innovation in Economics and Business III

Richard G. Milter, John E. Stinson, Wim H. Gijssels, 2013-03-09 Almost thirty years ago a friend involved in the education profession told me that in his estimation much more was caught by students outside of classrooms than was taught within those hallowed walls This statement has stuck with me through years of personal schooling working as a high school teacher working in management serving as a management consultant and trainer and facilitating learning on university campuses across the US eastern Europe and Asia Learning by doing is certainly something most people have experienced But the fact that there is more opportunity to learn more things today as never before with knowledge doubling every 20 months makes learning by doing more complicated As organizations move to respond to the rapid changes in their environments people within those organizations must face the uncertainty and ambiguity that comes with such conditions The one thing most futurists agree on is that the future will be very different than the present Exponential change has become commonplace Companies used to worry about redefining their goals and specific describing their place in an industry Today in order to survive they must be constantly addressing the issues inherent in redefining their industries

Genius at Scale Linda A. Hill, Emily Tedards, Jason Wild, 2026-03-03 Innovation doesn't just happen You need to lead it Discover the three critical roles leaders must play in driving and scaling innovation Constant tech disruption Unrelenting economic volatility Radically shifting demographics and work norms More than ever we need to innovate amid these daunting global challenges But do we have the leadership it takes to make this innovation happen successfully As preeminent leadership scholar Linda Hill Harvard researcher Emily Tedards and former Microsoft innovation executive Jason Wild show in this powerful book there are indeed exemplary leaders to learn from and the authors present their stories in fascinating detail not only igniting your imagination but providing instructive and inspiring models to follow Hill's award winning book Collective Genius began the crucial task of showing that successful innovation doesn't just happen it needs to be led Genius at Scale breaks new ground showing how moving from generating new ideas to actually scaling them involves cocreation collaborating experimenting and learning with others both inside and beyond the boundaries of the organization This requires three distinct types of leadership Leader as Architect shaping culture and capabilities for cocreation Leader as Bridger building partnerships across teams and

organizations Leader as Catalyst activating and cultivating movements across ecosystems The authors vividly profile these three types of leaders with individuals from all kinds of companies from Mastercard Pfizer and Procter Gamble to Cleveland Clinic Abu Dhabi Sampark Foundation and ANA spinoff avatarin who illustrate the mindset skills and digital savvy needed for leading in a world more uncertain and challenging than ever before Genius at Scale provides an essential guide to mastering the art and practice of innovation for any current or aspiring leader
