Ipad Prices:

The Price of Global Health Ed Schoonveld, 2016-02-24 Public debate on the rising cost of new biotechnology drug treatments has intensified over the last few years as healthcare budget pressures have mounted under a strained economy. Meanwhile the demand for new effective medical and drug treatments continues to rise as unhealthy lifestyles cause further increases in diabetes and cardiovascular disease. Global drug pricing is one of the most hotly debated yet least understood aspects of the pharmaceutical industry. How should drug prices be set and what does it mean for patients? Why do governments increasingly get involved and what is its impact on the global competitive environment? How can a life saving industry have a poorer image than gun and tobacco industries whose products are associated with death? Ed Schoonveld explains how pharmaceutical prices are determined in a complex global payer environment and what factors influence the process. His insights will help a wide range of audiences from healthcare industry professionals to policy makers and the broader public to gain a better understanding of this highly complex and emotionally charged field.
