   Generative AI from Beginner to Paid Professional, Part 3 Bolakale Aremu,2024-11-19 Dive deep into the world of Hugging Face and unlock the tools you need to create fine tune and deploy state of the art AI models Part 3 of the Generative AI from Beginner to Paid Professional series is your complete guide to mastering Hugging Face s powerful ecosystem through practical projects and real world applications This book takes you beyond the basics providing hands on exercises and expert insights to help you leverage Hugging Face for NLP vision tasks and beyond You ll not only learn to work with pretrained models but also gain the skills to customize and deploy AI solutions that solve real world problems What s inside Practical Hands On Learning Master Hugging Face tools by building projects like text summarization chatbots and image classification Advanced Techniques Learn fine tuning model optimization and efficient inference for high performance applications Real World Deployments Understand how to host models on Hugging Face Spaces and integrate them into pipelines with tools like LangChain Production Ready Projects Get step by step guidance on creating deployable AI solutions from concept to implementation By the end of this book you ll have the confidence and skills to design and deliver professional grade AI solutions whether for personal projects freelance opportunities or enterprise applications Who this book is for This guide is perfect for data scientists AI enthusiasts and developers eager to take their skills to the next level and monetize their knowledge Whether you re a student or a professional Part 3 will prepare you to build innovative solutions and thrive in the booming AI industry Take the leap into AI mastery and start creating the future   Mastering Computer Vision with PyTorch 2.0 M. Arshad,2025-01-17 Unleashing the Power of Computer Vision with PyTorch 2 0 Key Features Covers core to advanced Computer Vision topics with PyTorch 2 0 s latest features and best practices Progressive learning path to ensure suitability for beginners and experts alike Tackles practical tasks like optimization transfer learning and edge deployment Book DescriptionIn an era where Computer Vision has rapidly transformed industries like healthcare and autonomous systems PyTorch 2 0 has become the leading framework for high performance AI solutions Mastering Computer Vision with PyTorch 2 0 bridges the gap between theory and application guiding readers through PyTorch essentials while equipping them to solve real world challenges Starting with PyTorch s evolution and unique features the book introduces foundational concepts like tensors computational graphs and neural networks It progresses to advanced topics such as Convolutional Neural Networks CNNs transfer learning and data augmentation Hands on chapters focus on building models optimizing performance and visualizing architectures Specialized areas include efficient training with PyTorch Lightning deploying models on edge devices and making models production ready Explore cutting edge applications from object detection models like YOLO and Faster R CNN to image classification architectures like ResNet and Inception By the end readers will be confident in implementing scalable AI solutions staying ahead in this rapidly evolving field Whether you re a student AI enthusiast or professional this book empowers you to harness the power of PyTorch 2 0 for Computer Vision What you will learn Build and

train neural networks using PyTorch 2 0 Implement advanced image classification and object detection models Optimize models through augmentation transfer learning and fine tuning Deploy scalable AI solutions in production and on edge devices Master PyTorch Lightning for efficient training workflows Apply real world techniques for preprocessing quantization and deployment Table of Contents1 Diving into PyTorch 2 02 PyTorch Basics3 Transitioning from PyTorch 1 x to PyTorch 2 04 Venturing into Artificial Neural Networks5 Diving Deep into Convolutional Neural Networks CNNs 6 Data Augmentation and Preprocessing for Vision Tasks7 Exploring Transfer Learning with PyTorch8 Advanced Image Classification Models9 Object Detection Models10 Tips and Tricks to Improve Model Performance11 Efficient Training with PyTorch Lightning12 Model Deployment and Production Ready Considerations **Hands-On Generative Adversarial Networks with PyTorch 1.x** John Hany,Greg Walters,2019-12-12 Apply deep learning techniques and neural network methodologies to build train and optimize generative network models Key FeaturesImplement GAN architectures to generate images text audio 3D models and moreUnderstand how GANs work and become an active contributor in the open source communityLearn how to generate photo realistic images based on text descriptionsBook Description With continuously evolving research and development Generative Adversarial Networks GANs are the next big thing in the field of deep learning This book highlights the key improvements in GANs over generative models and guides in making the best out of GANs with the help of hands on examples This book starts by taking you through the core concepts necessary to understand how each component of a GAN model works You ll build your first GAN model to understand how generator and discriminator networks function As you advance you ll delve into a range of examples and datasets to build a variety of GAN networks using PyTorch functionalities and services and become well versed with architectures training strategies and evaluation methods for image generation translation and restoration You ll even learn how to apply GAN models to solve problems in areas such as computer vision multimedia 3D models and natural language processing NLP The book covers how to overcome the challenges faced while building generative models from scratch Finally you ll also discover how to train your GAN models to generate adversarial examples to attack other CNN and GAN models By the end of this book you will have learned how to build train and optimize next generation GAN models and use them to solve a variety of real world problems What you will learnImplement PyTorch s latest features to ensure efficient model designingGet to grips with the working mechanisms of GAN modelsPerform style transfer between unpaired image collections with CycleGANBuild and train 3D GANs to generate a point cloud of 3D objectsCreate a range of GAN models to perform various image synthesis operationsUse SEGAN to suppress noise and improve the quality of speech audioWho this book is for This GAN book is for machine learning practitioners and deep learning researchers looking to get hands on guidance in implementing GAN models using PyTorch You ll become familiar with state of the art GAN architectures with the help of real world examples Working knowledge of Python programming language is necessary to grasp the concepts covered in this book *Practical Deep Learning for Cloud, Mobile, and Edge*

Anirudh Koul,Siddha Ganju,Meher Kasam,2019-10-14 Whether you re a software engineer aspiring to enter the world of deep learning a veteran data scientist or a hobbyist with a simple dream of making the next viral AI app you might have wondered where to begin This step by step guide teaches you how to build practical deep learning applications for the cloud mobile browsers and edge devices using a hands on approach Relying on years of industry experience transforming deep learning research into award winning applications Anirudh Koul Siddha Ganju and Meher Kasam guide you through the process of converting an idea into something that people in the real world can use Train tune and deploy computer vision models with Keras TensorFlow Core ML and TensorFlow Lite Develop AI for a range of devices including Raspberry Pi Jetson Nano and Google Coral Explore fun projects from Silicon Valley s Not Hotdog app to 40 industry case studies Simulate an autonomous car in a video game environment and build a miniature version with reinforcement learning Use transfer learning to train models in minutes Discover 50 practical tips for maximizing model accuracy and speed debugging and scaling to millions of users   *Learning TensorFlow.js* Gant Laborde,2021-05-10 Given the demand for AI and the ubiquity of JavaScript TensorFlow js was inevitable With this Google framework seasoned AI veterans and web developers alike can help propel the future of AI driven websites In this guide author Gant Laborde Google Developer Expert in machine learning and the web provides a hands on end to end approach to TensorFlow js fundamentals for a broad technical audience that includes data scientists engineers web developers students and researchers You ll begin by working through some basic examples in TensorFlow js before diving deeper into neural network architectures DataFrames TensorFlow Hub model conversion transfer learning and more Once you finish this book you ll know how to build and deploy production readydeep learning systems with TensorFlow js Explore tensors the most fundamental structure of machine learning Convert data into tensors and back with a real world example Combine AI with the web using TensorFlow js Use resources to convert train and manage machine learning data Build and train your own training models from scratch   *Intelligent Mobile Projects with TensorFlow* Jeff Tang,2018-05-22 Create Deep Learning and Reinforcement Learning apps for multiple platforms with TensorFlow Key Features Build TensorFlow powered AI applications for mobile and embedded devices Learn modern AI topics such as computer vision NLP and deep reinforcement learning Get practical insights and exclusive working code not available in the TensorFlow documentation Book Description As a developer you always need to keep an eye out and be ready for what will be trending soon while also focusing on what s trending currently So what s better than learning about the integration of the best of both worlds the present and the future Artificial Intelligence AI is widely regarded as the next big thing after mobile and Google s TensorFlow is the leading open source machine learning framework the hottest branch of AI This book covers more than 10 complete iOS Android and Raspberry Pi apps powered by TensorFlow and built from scratch running all kinds of cool TensorFlow models offline on device from computer vision speech and language processing to generative adversarial networks and AlphaZero like deep reinforcement learning You ll learn how to use or retrain existing TensorFlow models build

your own models and develop intelligent mobile apps running those TensorFlow models You ll learn how to quickly build such apps with step by step tutorials and how to avoid many pitfalls in the process with lots of hard earned troubleshooting tips What you will learn Classify images with transfer learning Detect objects and their locations Transform pictures with amazing art styles Understand simple speech commands Describe images in natural language Recognize drawing with Convolutional Neural Network and Long Short Term Memory Predict stock price with Recurrent Neural Network in TensorFlow and Keras Generate and enhance images with generative adversarial networks Build AlphaZero like mobile game app in TensorFlow and Keras Use TensorFlow Lite and Core ML on mobile Develop TensorFlow apps on Raspberry Pi that can move see listen speak and learn Who this book is for If you re an iOS Android developer interested in building and retraining others TensorFlow models and running them in your mobile apps or if you re a TensorFlow developer and want to run your new and amazing TensorFlow models on mobile devices this book is for you You ll also benefit from this book if you re interested in TensorFlow Lite Core ML or TensorFlow on Raspberry Pi **TurbolenceFD for C4D** White Paper Books,2015-02-23 Hands-On Transfer Learning with Python Dipanjan Sarkar,Raghav Bali,Tamoghna Ghosh,2018-08-31 Deep learning simplified by taking supervised unsupervised and reinforcement learning to the next level using the Python ecosystem Key Features Build deep learning models with transfer learning principles in Python implement transfer learning to solve real world research problems Perform complex operations such as image captioning neural style transfer Book Description Transfer learning is a machine learning ML technique where knowledge gained during training a set of problems can be used to solve other similar problems The purpose of this book is two fold firstly we focus on detailed coverage of deep learning DL and transfer learning comparing and contrasting the two with easy to follow concepts and examples The second area of focus is real world examples and research problems using TensorFlow Keras and the Python ecosystem with hands on examples The book starts with the key essential concepts of ML and DL followed by depiction and coverage of important DL architectures such as convolutional neural networks CNNs deep neural networks DNNs recurrent neural networks RNNs long short term memory LSTM and capsule networks Our focus then shifts to transfer learning concepts such as model freezing fine tuning pre trained models including VGG inception ResNet and how these systems perform better than DL models with practical examples In the concluding chapters we will focus on a multitude of real world case studies and problems associated with areas such as computer vision audio analysis and natural language processing NLP By the end of this book you will be able to implement both DL and transfer learning principles in your own systems What you will learn Set up your own DL environment with graphics processing unit GPU and Cloud support Delve into transfer learning principles with ML and DL models Explore various DL architectures including CNN LSTM and capsule networks Learn about data and network representation and loss functions Get to grips with models and strategies in transfer learning Walk through potential challenges in building complex transfer learning models from scratch Explore real world research problems related to
