without violating the First Amendment Reitman examines financial companies and the role they have played in policing speech as well as the laws and corporate policies that have enabled this form of censorship Weaving together over a decade of research with interviews and narratives from those personally impacted by financial censorship Reitman reveals how financial exclusion has become a tool to pressure marginalized voices into silence From the executive director of a voting rights nonprofit to a teacher of Iranian poetry to adult content creators and the cannabis community Reitman uplifts the voices of those who have been targeted by these powerful institutions She uses their stories as a launching point to explore larger issues about who should have the power to censor in a democratic society Insightful and fresh Transaction Denied exposes this new and alarming form of censorship and offers a path forward by advocating for communities affected by financial exclusion and calling for more transparency of our financial systems

individual reviews to understand the nature of the overall sentiment In a way product details overall sentiment summaries and individual reviews form a network of information that users explore to make their purchase decisions This work studies the user behavior when they are exploring this network of product and sentiment information and how it may relate to online sales

**Online Consumer Reviews** Hessamedin Vali,2016 Consumer reviews as an important source of product information are becoming popular in online markets Due to lack of physical access

to the product and variation among buyer preferences there is always the risk of selecting an inappropriate product that doesn't meet a customer's needs. If this happens not only does the buyer face an uncomfortable situation but also the seller will be in jeopardy of losing potential customers as well as paying warranty-related costs and expenses. In the second chapter the focus is on different types of conflicting information among reviews as factors that affect their informativeness and accuracy of a purchasing decision. Cognitive load theory explains that when a type of review conflict is easy to capture but cannot be related to a product like a conflicting star rating the cognitive load is too low and the product information cannot be captured. Conflicting attributes can be easily related to a product and they are easy to capture therefore the cognitive load is medium and the delivered information is high. In the third chapter the focus is on the effect of a review's repeating purchase cues on the overall perceived value of the product. In summary when a positive review includes repeating purchase cues positive reviews are perceived more helpful than negative reviews. Finally the value of review dimensions and review format on the review's perceived value is studied. In general comparison reviews are perceived to be more valuable than noncomparison reviews. However in the field of consumer reviews comparing reviews provides too much information and overwhelms the potential buyer. By categorizing information in a table format the overwhelming issue can be managed so comparing reviews in a table format is perceived more valuable than existing traditional reviews.
