Three-level Centers of Vocational Excellence: Qualification, Entrepreneurship and Innovation in the Green Economy Jürgen Hogeforster, 2024-08-21 Meeting the challenges in the fields of energy, climate and environmental protection requires comprehensive reorientation and forward-looking innovations. These tasks must be mastered by SMEs against the background of the following problems: blatant growing shortage of skilled workers, large qualification deficits especially in the Green Economy, loss of attractiveness, low qualification of school-based VET, low rates of further training, insufficient orientation of offers to SME needs, ageing of entrepreneurs, high growing shortage of young people, demographic change, failure of business transfers, low rates of business start-ups, low innovation rates, insufficient productivity, not enough cooperation between universities and SMEs, a lack of teaching geared to SME needs, comparably low internationalization of SMEs, many vocational training providers. To meet these challenges, 22 project partners from 7 countries and 70 associated partners from 13 countries have developed, operated and ensured the long-term continuation of eight centres of vocational excellence for the green economy. The centres introduce dual education and implement a wide range of measures in vocational training, further education and higher education which are developed, tested and evaluated in the project. The eight centres developed and implemented 7 Train the Trainer programs, 59 vocational trainings, further education and study programs, 5 tools and support programs and 10 concepts and political strategy programs. The educational measures cover Green Economy, Digitalization and Entrepreneurship. Vocational and educational counselling and innovation support for SMEs were developed and implemented.

Basics of Entrepreneurship, 2004 *Dual bachelor's programs with integrated initial and further vocational training* Jürgen Hogeforster, Anna-Maria Czarny, Christian Wildt, 2025-10-20 Due to demographic

factors a significant shortage of entrepreneurs managers and skilled workers already exists and this trend is expected to continue increasing At the same time vocational education is becoming less attractive as more young people prefer to pursue academic studies While university graduates possess theoretical knowledge they often lack the practical skills that small and medium sized enterprises urgently require There is limited permeability between vocational and academic education The BA VET project aims to increase permeability and establish dual study programmes with integrated vocational training These programmes are structured in three stages allowing for the attainment of three educational qualifications a vocational training qualification a recognised advanced vocational qualification and a Bachelor s degree The relevant study modules should also be usable independently of the degree programme for delivering vocational continuing education The objective is to train professionals and managers who possess both theoretical knowledge and practical skills as well as relevant professional experience This is intended to provide businesses with the urgently needed new generation of professionals managers and entrepreneurs thereby strengthening their competitiveness To achieve these ambitious goals two dual Bachelor s degree programmes were developed practically tested evaluated and implemented Business Administration Sustainable Management of SMEs and Management of Renewable Building Energy Technology This publication sums up the results of the project and BA VET and shares its insights *Asian Development Bank and International Cooperation Handbook* IBP USA, *Continuing Education* ,1974 Higher Education in China Jianmin Gu,Xueping Li,Lihua Wang,2018-09-29 This book offers international readers a comprehensive introduction to higher education in China and will help readers around the globe make sense of the huge and complex machinery that makes up the university and college sector in China today It accompanies readers step by step allowing them to understand the most important aspects of this sector in China its history and development its scope and structure its operational system and management and its enrollment and employment processes It also provides an overview of the various levels of higher education in China namely specialized higher education undergraduate education postgraduate education research and faculty In short the book will tell you what higher education in China is and how it works While economic globalization and internationalization of higher education have greatly reduced the differences among educational systems in various countries it cannot be denied that any given country s higher education system needs to be deeply rooted in its culture and traditions In this book we highlight several distinctive characteristics of higher education in China including the ancient roots and modern history massive scale diversity and centralized management and pragmatic trends **Basics of Business Management** ,2014 Small Business Sourcebook ,1996 A guide to the information services and sources provided to 100 types of small business by associations consultants educational programs franchisers government agencies reference works statisticians suppliers trade shows and venture capital firms **The National Guide to Educational Credit for Training Programs** American Council on Education,2005 Highlights over 6 000 educational programs offered by business labor unions schools training
