REVISION METHOD

Create a charge

To charge a credit card or other payment source, you create a `Charge` object. If your API key is in test mode, the supplied payment source (e.g., `card`) won't actually be charged, although everything else will occur as if in live mode. (Stripe assumes that the charge would have completed successfully).

Arguments

amount <small>required</small>	A positive integer representing how much to charge, in the smallest currency unit (e.g., 100 cents to charge \$1.00, or 100 to charge ¥100, a zero-decimal currency). The minimum amount is \$0.50 USD or equivalent in charge currency.
currency <small>required</small>	Three-letter ISO currency code, in lowercase. Must be a supported currency.
application_fee <small>optional</small>	A fee in cents that will be applied to the charge and transferred to the application owner's Stripe account. The request must be made with an OAuth key or the <code>Stripe-Account</code> header in order to take an application fee. For more information, see the application fees documentation.

POST /v1/charges

Example Request

```
curl https://api.stripe.com/v1/charges \
  -H 'sk_test_4e238cd45626b8060e6010714e8764c1 \
  -d amount=100 \
  -d currency=usd \
  -d source=tok_visa \
  -d description="Charge for jenny.ross@example.com"
```

Authoritative Guide to Efficient Coding is the ultimate resource for anyone eager to master the Nim programming language. Whether you're a beginner starting your programming journey or an experienced developer looking to enhance your skills, this book provides an in-depth exploration of Nim's robust features. It leads readers through a systematic progression from fundamental concepts to sophisticated programming techniques, offering a profound understanding of Nim's unique strengths in efficiency, expressiveness, and flexibility. Immerse yourself in the essentials of Nim, covering everything from its syntax and semantics to advanced data structures and algorithms. Learn to organize your programs with modules, manage concurrency and parallelism for peak performance, and effortlessly integrate with C and JavaScript for versatile cross-platform development. With dedicated chapters on debugging, testing, and best practices, you will not only craft efficient Nim code but also ensure its reliability and maintainability. Comprehensive Nim Programming equips you with the expertise to address real-world programming challenges using Nim's extensive standard library and third-party packages. Whether you're creating high-performance applications, web services, or engaging in systems programming, this guide is your pathway to becoming a proficient Nim developer. Unlock Nim's full potential and elevate your programming endeavors with this authoritative guide.

[Big Java](#) Cay S. Horstmann, 2019-02-21. Big Java Early Objects 7th Edition focuses on the essentials of effective learning and is suitable for a two-semester introduction to programming sequence. This text requires no prior programming experience and only a modest amount of high school algebra. Objects and classes from the standard library are used where appropriate in early sections, with coverage on object-oriented design starting in Chapter 8. This gradual approach allows students to use objects throughout their study of the core algorithmic topics without teaching bad habits that must be unlearned later. The second half covers algorithms and data structures at a level suitable for beginning students.

Brief Java Cay S. Horstmann, 2019-04-26. Brief Java Early Objects 9th Edition focuses on the essentials of effective learning and is suitable for a two-semester introduction to programming sequence. This text requires no prior programming experience and only a modest amount of high school algebra. Objects and classes from the standard library are used where appropriate in early sections, with coverage on object-oriented design starting in Chapter 8. This gradual approach allows students to use objects throughout their study of the core algorithmic topics without teaching bad habits that must be unlearned later. Choosing the enhanced eText format allows students to develop their coding skills using targeted progressive interactivities designed to integrate with the eText. All sections include built-in activities, open-ended review exercises, programming exercises, and projects to help students practice programming and build confidence. These activities go far beyond simplistic multiple-choice questions and animations. They have been designed to guide students along a learning path for mastering the complexities of programming. Students demonstrate comprehension of programming structures, then practice programming with simple steps in scaffolded settings, and finally write complete, automatically graded programs. The perpetual access VitalSource Enhanced eText, when integrated with your school's learning management system, provides the

capability to monitor student progress in VitalSource SCORECenter and track grades for homework or participation Enhanced eText and interactive functionality available through select vendors and may require LMS integration approval for SCORECenter
