The State of the Art in Student Engagement Carl Senior,2015-07-10 There is an extensive literature conducted from a range of theoretical perspectives and methodologies on the role of groups and student learning in higher education However here the concept of the group is heavily contested at a theoretical level but within higher education practice characterizing the group has tended to be clear cut Groups of students are often formed within the parameters of specific educational programs to address explicitly defined learning objectives These groups are often small scale and achieve tasks through cooperative or collaborative learning Cooperative learning involves students dividing roles and responsibilities between group members so learning becomes an independent process and outcome On the other hand collaborative learning involves students working together by developing shared meanings and knowledge to solve a task or problem From this perspective learning is conceptualized as both a social process and individual outcome That is collaborative learning may facilitate individual student conceptual understanding and hence lead to higher academic achievement The empirical evidence is encouraging as has been shown that students working collaboratively tend to achieve

higher grades than students working independently However the above perspectives on student engagement assume that groups are formed within the confines of formal learning environments e g lecture theaters involve students on the same degree program have the explicit function of achieving a learning task and disband once this has been achieved However students may also use existing social networks such as friendship groups as a mechanism for learning which may occur outside of formal learning environments There is an extensive literature on the role and benefits of friendship groups on student learning within primary and secondary education but there is a distinct lack of research within higher education This ebook is innovative and ambitious and will highlight and consolidate the current understanding of the role that student based engagement behaviors may serve in effective pedagogy A unique aspect of this research topic will be the fact that scholars will also be welcome to submit articles that describe the efficacy of the full range of approaches that have been employed to facilitate student engagement across the sector

Teaching Online Claire Howell Major, 2015-03-15 Demystifies online teaching for both enthusiastic and wary educators and helps faculty who teach online do their best work as digital instructors It is difficult to imagine a college class today that does not include some online component whether a simple posting of a syllabus to course management software the use of social media for communication or a full blown course offering through a MOOC platform In *Teaching Online* Claire Howell Major describes for college faculty the changes that accompany use of such technologies and offers real world strategies for surmounting digital teaching challenges Teaching with these evolving media requires instructors to alter the ways in which they conceive of and do their work according to Major They must frequently update their knowledge of learning teaching and media and they need to develop new forms of instruction revise and reconceptualize classroom materials and refresh their communication patterns Faculty teaching online must also reconsider the student experience and determine what changes for students ultimately mean for their own work and for their institutions *Teaching Online* presents instructors with a thoughtful synthesis of educational theory research and practice as well as a review of strategies for managing the instructional changes involved in teaching online In addition this book presents examples of best practices from successful online instructors as well as cutting edge ideas from leading scholars and educational technologists Faculty members researchers instructional designers students administrators and policy makers who engage with online learning will find this book an invaluable resource

Discovering Psychology Don Hockenbury, Sandra E. Hockenbury, 2016-03-02 Sandra Hockenbury and new coauthor Susan Nolans remarkable textbook is grounded in the belief that all kinds of students can develop a real understanding of psychology and lasting scientific literacy The authors act on that belief by using relatable personal stories to communicate the concepts of psychological science and the process of science itself and by presenting important research in a clear not oversimplified way Hockenbury and Nolan also take full advantage of online learning creating activities in LaunchPad that have students thinking about psychology as scientists do New co author Susan Nolan of Seton Hall University was recently designated a Master Teacher by the Society
