Jae Wan Chung,2015-04-09 The world is a veritable stage for superpowers Major historical events are best viewed as the
outcomes of games played by superpowers for their own economic interests The objective of this book is to explore the
primary cause of global historical events A global economic disparity GED motivates superpowers to pursue their interests
and results in the corresponding global historical event GHE This book explores the causal relationships between GEDs and
GHEs that stand out in recent global history since the first Industrial Revolution taking a geoeconomic approach which
encompasses economics international political affairs history and geography The book confirms the causalities between GEDs
and GHEs It is a pioneering work that provides a unique but powerful policy implication in order to alleviate international
conflicts and tensions between superpowers it is necessary to reduce GEDs And since it is virtually impossible for a few
superpowers to reduce the GEDs the world economy needs a multipolar economic system for global stability through
competition The book was written shortly after the world economy was trapped within downward spirals caused by the US
financial crisis and its contagion As a collective representation of GEDs in various areas the financial disparity is a central
part of GEDs The book rigorously examines the financial crisis 2008 2014 in the United States and the Fed s response a
program of quantitative easing QE implemented in three phases while bearing in mind that the origin of the current crisis is
not solely the financial sector or stock markets but worldwide economic disequilibrium This book also focuses on the details
for the causal relationships prevailing in several major areas human resources raw materials energy environment and
poverty Forthcoming Books Rose Arny,2004 Monthly Bulletin of Books Added to the Public Library of the City of
