## GCSE MATHEMATICS

Higher Tier

Paper 2 Calculator

# H

Time allowed: 1 hour 30 minutes

### Materials

For this paper you must have:

- a calculator
- mathematical instruments.

### Instructions

- Use black ink or black ball-point pen. Draw diagrams in pencil.
- Fill in the boxes at the top of this page.
- Answer all questions.
- You must answer the questions in the spaces provided. Do not write outside the box around each page or on blank pages.
- If you need extra space for your answer(s), use the lined pages at the end of this book. Write the question number against your answer(s).
- Do all rough work in this book. Cross through any work you do not want to be marked.

### Information

- The marks for questions are shown in brackets.
- The maximum mark for this paper is 80.
- You may ask for more answer paper, graph paper and tracing paper. These must be tagged securely to this answer book.

### Advice

In all calculations, show clearly how you work out your answer.

## Aqa Maths Paper June 2013

**Anne Haworth, Paul Winters, H. Prior, Consultant Virologist Lothian Health Board Edinburgh and Director of the Regional Virology Laboratory S Burns, S. Burns, Margaret Thornton, Shaun Procter-Green, David Pritchard, Tony Fisher, David Ridgway**

## **Aqa Maths Paper June 2013:**

**AQA Sociology for A-level Book 1** David Bown, Laura Pountney, Tomislav Maric, 2015-10-16 Exam Board AQA Level AS A level Subject Sociology First Teaching September 2015 First Exam June 2016 Build students understanding with this concept driven approach to the 2015 AQA A level Sociology specification written by a team of leading subject authors and approved by AQA Develop the knowledge required to master Year 1 topics with clear and accessible content coverage Build confidence in the evaluative skills needed to assess sociological theories and research Strengthen learning and revision with a wealth of practice and extension questions and activities

**Conceptual Maths** Peter Mattock, 2023-04-05 Written by Peter Mattock Conceptual Maths Teaching about rather than just how to do mathematics in schools aims to empower teachers to support students on a comprehensive and coherent journey through school mathematics Showcasing the best models metaphors and representations it provides excellent examples explanations and exercises that can be used across the curriculum Concepts are at the heart of the study of mathematics They are the ideas that remain constant whenever they are encountered but which combine and build upon each other to create the mathematical universe It is the structure of each concept that gives rise to the procedures that are used in calculation and problem solving and by learning about these structures a learner can make sense of how different processes work and use them flexibly as need demands In his first book Visible Maths Peter Mattock focused on the use of representations and manipulatives as images and tools and how this can provide a window into some of these mathematical structures His aim in Conceptual Maths is to go deeper beyond the procedures and to shed greater light on the structures of the subject's different concepts The book explores how a variety of visual tools and techniques can be used in the classroom to deepen pupils understanding of mathematical structures concepts and operations including number addition and subtraction multiplication and multiples division and factors proportionality functionality measures accuracy probability shape and transformation and vectors among many others In so doing Peter equips teachers with the confidence and practical know how to help learners assimilate knowledge of mathematical concepts into their schema and take their learning to the next level Containing numerous full colour diagrams and models to illustrate the conceptual takeaways and teaching techniques discussed Conceptual Maths also includes a glossary covering the key mathematical terms Suitable for teachers of maths in primary secondary and post 16 settings

The Working Classroom Matt Bromley, Andy Griffith, 2023-11-08 Schools do amazing work to support children from disadvantaged backgrounds But this book will enable them to do more Disadvantage comes in many forms but cultural poverty where some students have relative knowledge gaps compared with their more affluent peers can be addressed successfully by schools The Working Classroom explores how working class students are disadvantaged by a flawed system and what schools can do to close the gap Written by two experienced authors with a deep understanding of the challenges that poverty and low aspiration can bring and a passion for social justice The Working Classroom examines how and why we

must seek systemic changes The book focuses on actions within the control of teachers and school leaders which will ensure that we create a socially just education system one that builds on the rich heritage of the working class rather than seeing their background as a weakness It offers practical ways for students and families to build on the best of working class culture whilst also empowering teachers students and parents to change the system The Working Classroom provides teachers with useful methods to improve the cultural capital of students from disadvantaged backgrounds that can be easily replicated and implemented in their own setting Backed up by practical case studies that have a proven impact in schools with high levels of deprivation this book will enable teachers to audit their current provision and encourage them to adopt new systems and practices so that they and the wider school will have a greater impact on the lives of working class students and their families Suitable for both teachers and leaders in a secondary school or sixth form college setting who seek to support social change in education and anyone in the corporate or non education world who wants to practice effective altruism or philanthropy

**2012 GCSE English results** Great Britain: Parliament: House of Commons: Education Committee,2013-06-11 The 2012 GCSE English results prompted significant controversy which ultimately resulted in an application for judicial review This report sets out the background to these events and identifies lessons to be learned The problems with GCSE English can be traced back to the 2007 09 development phase of the qualification in particular the turbulence which resulted from the shift away from a mostly linear to a modular system combined with a high proportion of controlled assessment and generous marking tolerances Exam board experts raised concerns at the time but these were not acted upon by the regulator the then interim Ofqual Further difficulties arose because of pressures from the school accountability system The problems experienced with GCSE English in 2012 highlighted serious weaknesses in the moderation of speaking and listening with consequences for grade awarding The current status of Ofqual as an independent regulator accountable to Parliament is the right one However the Coalition Government is bringing in wholesale changes to GCSEs and A levels to a tight timetable and at the same time Ofqual must have systems in place The Committee is also concerned that there is a rush towards separate exam systems for England Wales and Northern Ireland without careful reflection on what might be lost or consensus that this is the right thing to do
