## **Archaeological Theory In Practice:**

Archaeological Theory in Practice Patricia A Urban, 2017-07-05 In this concise friendly textbook Patricia Urban and Edward Schortman teach the basics of archaeological theory making explicit the crucial link between theory and the actual conduct of archaeological research The first half of the text addresses the general nature of theory as well as how it is used in the social sciences and in archaeology in particular To demonstrate the usefulness of theory the authors draw from research at Stonehenge Mesopotamia and their own long term research project in the Naco Valley of Honduras They show how theory becomes meaningful when it is used by very real individuals to interpret equally real materials These extended narratives exemplify the creative interaction between data and theory that shape our understanding of the past Ideal for introductory courses in archaeological theory

**Archaeological Theory in Practice** Patricia A Urban, Edward Schortman, 2017 Many students view archaeological theory as a subject distinct from field research This division is reinforced by the way theory is taught often in stand alone courses that focus more on logic and reasoning than on the application of ideas to fieldwork Divorcing thought from action does not convey how archaeologists go about understanding the past This book bridges the gap between theory and practice by looking in detail at how the authors and their colleagues used theory to interpret what they found while conducting research in northwest Honduras This is not a linear narrative Rather the book highlights the open ended nature of archaeological investigations in which theories guide research whose findings may challenge these initial interpretations and lead in unexpected directions Pursuing those novel investigations requires new theories that are themselves subject to refutation by newly gathered data The central case study is the writers work in Honduras The interrelations of fieldwork data theory and interpretation are also illustrated with two long running archaeological debates the emergence of inequality in southern Mesopotamia and inferring the ancient meanings of Stonehenge The book is of special interest to undergraduate Anthropology Archaeology majors and first and second year graduate students along with anyone interested in how archaeologists convert the static materials we find into dynamic histories of long vanished people

**Archaeological Theory and Scientific Practice** Andrew Jones,2001-12-06 Is archaeology an art or a science This

question has been hotly debated over the last few decades with the rise of archaeological science At the same time archaeologists have seen a change in the intellectual character of their discipline as many writers have adopted approaches influenced by social theory The discipline now encompasses both archaeological scientists and archaeological theorists and discussion regarding the status of archaeology remains polarised In this 2001 book Andrew Jones argues that we need to analyse the practice of archaeology Through an analysis of archaeological practice influenced by recent developments in the field of science studies and with the aid of extensive case studies he develops a new framework which allows the interpretative and methodological components of the discipline to work in tandem His reassessment of the status and character of archaeology will be of interest to students scholars and professionals *Decolonising Archaeological Theory and Practice* Claire Smith, Martin Wobst, 2005

**Theory in Archaeology** Peter J. Ucko, 2005-08-10 Theory in Archaeology tackles important questions about the diversity in archaeological theory and practice which face the discipline in the 1990s What is the relationship between theory and practice How does World archaeological theory differ from European Can one be a good practitioner without theory This unique book brings together contributors from many different countries and continents to provide the first truly global perspective on archaeological theory They examine the nature of material culture studies and look at problems of ethnicity regionalism and nationality They consider too another fundamental of archaeological inquiry can our research be objective or must the past always be a relativistic construction Theory in Archaeology is an important book whose authors bring together very different perceptions of the past Its wide scope and interest will attract an international readership among students and academics alike

**Archaeological Theory** Norman Yoffee, Andrew Sherratt, 1993-07-22 This volume assesses the real achievements of archaeology in increasing an understanding of the past Without rejecting the insights either of traditional or more recent approaches it considers the issues raised in current claims and controversies about what is appropriate theory for archaeology The first section looks at the process of theory building and at the sources of the ideas employed The following studies examine questions such as the interplay between expectation and evidence in ideas of human origins social role and material practice in the formation of the archaeological record and how the rise of states should be conceptualised further papers cover issues of ethnoarchaeology visual symbols and conflicting claims to ownership of the past The conclusion is that archaeologists need to be equally wary of naive positivism in the guise of scientific procedure and of speculation about the unrecorded intentions of prehistoric actors
