Principles Of Modern Political Science:

Principles of Modern Political Science J. C. Johari, 2009-06-15 Remarkable developments have taken place in the domain of political theory in the present age of liberalisation and globalisation The concept of the nation state has undergone a major change on account of the irresistible erosion of sovereignty in the internal and external spheres and the emergence of the model of a transnational state Different models of state may be seen in the countries of the Third World It has put a question mark on the future of the nation state The basic tenets of liberalism have been challenged by Neo liberalism and Communitarianism with the result that now it is on the retreat In the post World War II period the New Fabians had revised the tenets of Fabianism but in the post Cold War era it has been replaced by the Third Way The pluralists had attacked the classical theory of sovereignty but the neo pluralists have given a new shape to it The theme of political legitimacy has been revisited The old concept of citizenship requires to be reinterpreted in the contexts of civic republicanism multi culturalism and identity politics It has happened with other themes as well which may be taken note of in the emergence of new topics like Neo colonialism Post colonialism Post communism and the like The task of a political scientist is to comprehend and critically describe the underlying principles of political behaviour in their empirical as well as normative dimensions Inter disciplinary focus has become so popular now that the implications of the themes of various social sciences have penetrated into the domain of each other The discipline of political science has become a study of power and of struggle for its sake at any level local regional national and international In the light of these salient features university courses have been modernised and the author has done well to cover them in this work so as to adequately meet the requirements of students offering this course at the degree and postgraduate levels and of candidates preparing for competitive examinations

Eric Voegelin and the Foundations of Modern Political Science Barry Cooper, Eric Voegelin, 1999 Annotation This important new work is a major analysis of the foundation of Eric Voegelin s political science Barry Cooper maintains that the writings Voegelin undertook in the 1940s provide the groundwork for the brilliant book that is one of his best known The

New Science of Politics At the time of that book's publication however few were aware of the enormous knowledge and accomplished scholarship that lay behind its illuminating although sometimes baffling formulations By focusing on several of the key chapters in Voegelin's eight volume History of Political Ideas especially the studies of Bodin Vico and Schelling Cooper shows how those studies provide the basis for Voegelin's thought Investigating Voegelin's study of Oriental influences on Western political ideas especially Mongol constitutional law and his study of Toynbee Cooper seeks to demonstrate the vast range of materials Voegelin used Cooper contends that as with other great thinkers political crisis specifically the world war of 1939-1945 stimulated Voegelin's intellectual and spiritual achievement He provides an analysis of Voegelin's immediate concern with the course of World War II his ability to understand those dramatic events in a large context and his ability to provide an insightful account of the causes the significance and the consequences of the spiritual and political disorder that was evident all around him In Eric Voegelin and the Foundations of Modern Political Science Cooper makes the connection between Voegelin's political writings of the 1940s and the meditative interpretations that began to appear with the publication of Anamnesis and with the later volumes of Order and History much more intelligible than does any existing discussion of Voegelin Scholars in intellectual history and political science will benefit enormously from this valuable new addition to Voegelin studies
