Breaking Away Maurice E. Stucke, 2022 *Breaking Away* sounds a warning call alerting readers that their privacy and autonomy concerns are indeed warranted and the remedies deserve far greater attention than they have received from our leading policymakers and experts to date Through the various prisms of economic theory market data policy and law the book offers a clear and accessible insight into how a few powerful firms Google Apple Facebook Meta and Amazon have used the same anticompetitive playbook and manipulated the current legal regime for their gain at our collective expense While much has been written about these four companies power far less has been said about addressing their risks In looking at the proposals to date however policymakers and scholars have not fully addressed three fundamental issues First will more competition necessarily promote our privacy and well being Second who owns the personal data and is

that even the right question Third what are the policy implications if personal data is non rivalrous Breaking Away not only articulates the limitations of the current enforcement and regulatory approach but offers concrete proposals to promote competition without having to sacrifice our privacy This book explores how these platforms accumulated their power why the risks they pose are far greater than previously believed and why the tools need to be far more robust than what is being proposed Policymakers scholars and business owners managers and entrepreneurs seeking to compete and innovate in the digital platform economy will find the book an invaluable source of information
