Review of the Federal Strategy for Nanotechnology-Related Environmental, Health, and Safety Research National Research Council, Division on Engineering and Physical Sciences, National Materials Advisory Board, Division on Earth and Life Studies, Board on Environmental Studies and Toxicology, Committee for Review of the Federal Strategy to Address Environmental, Health, and Safety Research Needs for Engineered Nanoscale Materials, 2009-03-17 This new book from the National Research Council finds serious weaknesses in the government's plan for research on the potential health and environmental risks posed by nanomaterials which are increasingly being used in consumer goods and industry An effective national plan for identifying

Such a plan will ensure the timely development of engineered nanoscale materials that will bring about great improvements in the nation's health, its environmental quality, its economy, and its security.
