Read the short passage and answer the questions.

The Dog and the Shadow

It happened that a Dog had got a piece of meat and was carrying it home in his mouth to eat it in peace. Now on his way home, he had to cross a plank lying across a running brook. As he crossed, he looked down and saw his own shadow reflected in the water beneath. Thinking it was another dog with another piece of meat, he made up his mind to have that also. So he made a snap at the shadow in the water, but as he opened his mouth the piece of meat fell out, dropped into the water and was never seen more.

Simplified Signs: A Manual Sign-Communication System for Special Populations, Volume 1. John D. Bonvillian, Nicole Kissane Lee, Tracy T. Dooley, Filip T. Loncke, 2020-07-30 Simplified Signs presents a system of manual sign communication intended for special populations who have had limited success mastering spoken or full sign languages It is the culmination of over twenty years of research and development by the authors The Simplified Sign System has been developed and tested for ease of sign comprehension memorization and formation by limiting the complexity of the motor skills required to form each sign and by ensuring that each sign visually resembles the meaning it conveys Volume 1 outlines the research underpinning and informing the project and places the Simplified Sign System in a wider context of sign usage historically and by different populations Volume 2 presents the lexicon of signs totalling approximately 1000 signs each with a clear illustration and a written description of how the sign is formed as well as a memory aid that connects the sign visually to the meaning that it conveys While the Simplified Sign System originally was developed to meet the needs of persons with intellectual disabilities cerebral palsy autism or aphasia it may also assist the communication needs of a wider audience such as healthcare professionals aid workers military personnel travellers or parents and children who have not yet mastered spoken language The system also has been shown to enhance learning for individuals studying a foreign language Lucid and comprehensive this work constitutes a valuable resource that will enhance the communicative interactions of many different people and will be of great interest to researchers and educators alike

Oxford Handbook of Deaf Studies, Language, and Education Marc Marschark, Patricia Elizabeth Spencer, 2005. In Plato's *Cratylus*, which dates to 360 B.C., Socrates alludes to the use of signs by deaf people. In his *Natural History*, completed in 79 A.D., Pliny the Elder alludes to Quintus Pedius, the deaf son of a Roman consul who had to seek permission from Caesar Augustus to pursue his training as an artist. During the Renaissance, scores of deaf people achieved fame throughout Europe, and by the middle of the 17th century, the talents and communication systems of deaf people were being studied by a variety of noted scientists and philosophers. However, the role of deaf people in society has always been hotly debated: could they be educated? Should they be educated? If so, how? How does Deaf culture exist within larger communities? What do advances in the technology and the genetics of hearing loss portend for Deaf communities? In this landmark volume, a wide range of international experts present a comprehensive and accessible overview of the diverse field of deaf studies, language, and education. Pairing practical information with detailed analyses of what works, why, and for whom, and banishing the paternalism once intrinsic to the field, the handbook consists of specially commissioned essays on topics such as language and language development, hearing and speech perception, education, literacy, cognition, and the complex cultural, social, and psychological issues associated with individuals who are deaf or hard of hearing. Through careful planning, collaboration, and editing, the various topics are interwoven in a manner that allows the reader to understand the current status of research in the field and recognize the opportunities and challenges that lie ahead, providing the most comprehensive reference resource.

on deaf issues Written to be accessible to students and practitioners as well as researchers The Oxford Handbook of Deaf Studies Language and Education is a uniquely ambitious work that will alter both theoretical and applied landscapes It surveys a field that has grown dramatically over the past 40 years since sign languages were first recognized by scientists to be true languages From work on the linguistics of sign language and parent child interactions to analyses of school placement and the mapping of brain function in deaf individuals research across a wide range of disciplines has greatly expanded not just our knowledge of deafness and the deaf but of the very origins of language social interaction and thinking Bringing together historical information research and strategies for teaching and service provision Marc Marschark and Patricia Elizabeth Spencer have given us what is certain to become the benchmark reference in the field *Second and Third Grade Manual* Emma Miller Bolenius,1923 **Library Journal** Melvil Dewey,Richard Rogers Bowker,L.
