The Price of Global Health Ed Schoonveld, 2016-02-24 Public debate on the rising cost of new biotechnology drug treatments has intensified over the last few years as healthcare budget pressures have mounted under a strained economy. Meanwhile the demand for new effective medical and drug treatments continues to rise as unhealthy lifestyles cause further increases in diabetes and cardiovascular disease. Why do governments increasingly get involved and what is its impact on the global competitive environment? Ed Schoonveld explains how pharmaceutical prices are determined in a complex global payer environment and what factors influence the process.
