The Genome War James Shreeve, 2007-12-18 The long awaited story of the science the business the politics the intrigue behind the scenes of the most ferocious competition in the history of modern science the race to map the human genome On May 10 1998 biologist Craig Venter director of the Institute for Genomic Research announced that he was forming a private company that within three years would unravel the complete genetic code of human life seven years before the projected finish of the U S government s Human Genome Project Venter hoped that by decoding the genome ahead of schedule he would speed up the pace of biomedical research and save the lives of thousands of people He also hoped to become very famous and very rich Calling his company Celera from the Latin for speed he assembled a small group of scientists in an empty building in Rockville Maryland and set to work At the same time the leaders of the government program under the direction of Francis Collins head of the National Human Genome Research Institute at the National Institutes of Health began to mobilize an unexpectedly unified effort to beat Venter to the prize knowledge that had the potential to revolutionize medicine and society The stage was set for one of the most thrilling and important dramas in

the history of science The Genome War is the definitive account of that drama the race for the greatest prize biology has had to offer told by a writer with exclusive access to Venter s operation from start to finish It is also the story of how one man s ambition created a scientific Camelot where for a moment it seemed that the competing interests of pure science and commercial profit might be gloriously reconciled and the national repercussions that resulted when that dream went awry
