Routing type ?

**BGP dynamic routing**

The available routes are learned dynamically through BGP. The Oracle router learns the routes from your on-premises network, and advertises your VCN's subnets to your on-premises network.

**Static routing**

Routes are static and not learned dynamically. Here you provide routes to your on-premises network that you want the Oracle router to know about. Your network engineer must also configure your CPE device with static routes to the VCN's subnets.

**Policy based routing**

Use this option for a policy based CPE device or if you require multiple encryption domains.
