**Standardising English** Linda Pillière, Wilfrid Andrieu, Valérie Kerfelec, Diana Lewis, 2018-03-15 This path breaking study of the standardisation of English goes well beyond the traditional prescriptivism versus descriptivism debate It argues that the way norms are established and enforced is the result of a complex network of social factors and cannot be explained simply by appeals to power and hegemony It brings together insights from leading researchers to re centre the discussion on linguistic communities and language users It examines the philosophy underlying the urge to standardise language and takes a closer look at both well known and lesser known historical dictionaries grammars and usage guides demonstrating that they cannot be simply labelled as prescriptivist Drawing on rich empirical data and case studies it shows how the norm continues to function in society influencing and affecting language users even today Walford's Guide to Reference Material: Science and technology Marilyn Mullay, Library Association, 1989 The Brit counterpart to Sheehy in which it is recommended The new edition places the author title subject indices in each volume Many entries cite reviews from other sources Rather tiresome recitation of selected chapter contents 6 000 entries with references in the annotations to one or two thousand further books Covers sci tech and paleontology anthro patents medicine trades and crafts Arranged by UDC classification Provides no prices Available in the US from American Library Assn Annotation copyrighted by Book News Inc Portland OR **Social Sciences and Humanities Index**, 1916 Walford's Guide to Reference Material: Generalia, language and literature, the arts Albert John Walford, 1998 From its first edition the purpose of Walford has been to identify and evaluate the widest possible range of reference materials No rigid definition of reference is applied In addition to the expected bibliographies indexes dictionaries encyclopaedias and directories a number of important textbooks and manuals of general practice are included While the majority of the items are books Walford is a guide to reference material Thus periodical articles microforms online and CD ROM sources are all represented In this volume a particular effort has been made to improve coverage of the latter two categories *Catalogue of the Reference Library* Birmingham Free Libraries. Reference Department, John Davis Mullins, 1890 **Walford's Guide to Reference Material: Science and technology** Albert John Walford, Library Association, 1999 A core resource for the identification and evaluation of reference materials cited in BCL3 and Sheehy While the majority of items are books periodical articles microforms and online and CD ROM sources are also represented This revised and updated volume includes many 1998 publications as possible together with some items published early in 1999 Some 700 items have been added bringing the total to 7 594 No schedule is given for publication of volumes 2 and 3 but presumably the complete project will follow three year cycle established with previous editions **International Index to Periodicals**, 1915 An author and subject index to publications in fields of anthropology archaeology and classical studies economics folklore geography history language and literature music philosophy political science religion and theology sociology and theatre arts Walford's Guide to reference material.
