This two volume set of LCT 2023 constitutes the refereed proceedings of the 10th International Conference on Learning and Collaboration Technologies LCT 2023 held as Part of the 24th International Conference HCI International 2023 which took place in July 2023 in Copenhagen Denmark The total of 1578 papers and 396 posters included in the HCII 2023 proceedings volumes was carefully reviewed and selected from 7472 submissions The papers of LCT 2022 Part II are organized in topical sections named XR for Learning and Education Learning with Robots Virtual Blended and Hybrid Learning **Journal of Engineering Graphics** ,1963 Engineering Education John Heywood,2006-01-24 A synthesis of nearly 2 000 articles to help make engineers better educators While a significant body of knowledge has evolved in the field of engineering education over the years much of the published information has been restricted to scholarly journals and has not found a broad audience This publication rectifies that situation by reviewing the findings of nearly 2 000 scholarly articles to help engineers become better educators devise more effective curricula and be more effective leaders and advocates in curriculum and research development The author s first objective is to provide an illustrative review of research and development in engineering education since 1960 His second objective is with the examples given to encourage the practice of classroom assessment and research and his third objective is to promote the idea of curriculum leadership The publication is divided into four main parts Part I demonstrates how the underpinnings of education history philosophy psychology sociology determine the aims and objectives of the curriculum and the curriculum s internal structure which integrates assessment content teaching and learning Part II focuses on the curriculum itself considering such key issues as content organization trends and change A chapter on interdisciplinary and integrated study and a chapter on project and problem based models of curriculum are included Part III examines problem solving creativity and design Part IV delves into teaching assessment and evaluation beginning with a chapter on the lecture cooperative learning and teamwork The book ends with a brief insightful forecast of the future of engineering education Because this is a practical tool and reference for engineers each chapter is self contained and may be read independently of the others Unlike other works in engineering education which are generally intended for educational researchers this publication is written not only for researchers in the field of engineering education but also for all engineers who teach All readers acquire a host of practical skills and knowledge in the fields of learning philosophy sociology and history as they specifically apply to the process of engineering curriculum improvement and evaluation *Engineering Design Graphics Journal* ,1974 American Book Publishing Record Cumulative, 1950-1977 R.R. Bowker Company. Department of Bibliography,1978 **Empowering self-directed learners through digital innovation and open educational practices** Dorothy Laubscher,Chantelle Bosch,Marry Marry Mdakane,2026-02-27 Empowering self directed learners through digital innovation and open educational practices explores the interplay between self directed learning SDL open educational practices OEPs and digital innovation in education It represents an academic contribution to

the field of education specifically addressing the transformative potential of OEPs and digital technologies in fostering SDL. By exploring these aspects it contributes to the scholarly discourse on integrating SDL into digital and open learning environments thereby supporting the advancement of research and practice in these domains. The chapters collectively explore how SDL can be supported and enhanced through OEPs and digital innovation. The book incorporates a variety of research methodologies including a literature review, a systematic literature review, theory synthesis, and both quantitative and qualitative research. These diverse methodological lenses provide a robust analysis of the topic, ensuring the work contributes original evidence-based insights to the academic community. The unique contribution of *Empowering self-directed learners through digital innovation and open educational practices* lies in its detailed exploration of how OEPs and digital innovation promote SDL, presenting novel frameworks, strategies, and guidelines for educators, facilitators, and researchers. By emphasising the practical and theoretical implications of these intersections, the book addresses critical gaps in existing research while aligning with Sustainable Development Goals (SDGs) 4 and 9. Specifically, the focus is on fostering inclusive and equitable education to support lifelong learning (SDG 4) while the strategic application of digital technologies to improve teaching efficiency and transform educational practices addresses innovation and infrastructure goals (SDG 9). The target audience includes higher education researchers, academics, educators, and postgraduate students specialising in SDL, OEPs, and digital innovation in education. By addressing this specialised audience, the book remains firmly within the scholarly domain, advancing academic discussions and providing actionable insights for future research and practice.
