*Political Technology* Andrew Wilson, 2023-12-14 Political technology is a Russian term for the professional engineering of politics. It has turned Russian politics into theatre and propaganda and metastasised to take over foreign policy and weaponise history. The war against Ukraine is one outcome. In the West, spin doctors and political consultants do more than influence media or run campaigns; they have also helped build parallel universes of alternative political reality. Hungary has used political technology to dismantle democracy. The BJP in India has used it to consolidate unprecedented power. Different countries learn from each other. Some types of political technology have become notorious, like troll farms or data mining, but there is now a global wholesale industry selling a range of manipulation techniques from astroturfing to fake parties to propaganda apps. This book shows that political technology is about much more than online disinformation; it is about whole new industries of political engineering.

**Populism and Professional Wrestling in the Sunbelt South** Christopher L. Stacey, 2023-12-06 Populism and Professional Wrestling in the Sunbelt South. From Rasslin to Sports Entertainment traces the history of professional wrestling in the South within the Trans Mississippi Region between the 1950s and 1990s. Examining professional wrestling through the lens of kayfabe, also known as the perception of the realism and the suspension of disbelief among fans, this book discovers that the dissolution of kayfabe occurred simultaneously with significant political, social, and cultural events in Southern history, including the Civil Rights Movement and technological and economic modernity. Christopher L. Stacey determines that the same political, social, economic, and cultural forces of modernity in the Sunbelt South reflected a new form of southern and national populism embedded within the professional wrestling industry. New forms of populism were reflected within characters, storylines, gimmicks, and angles of several territories in the Trans Mississippi region. Through autobiographies, biographical information, and shoot interviews, Stacey provides a closer look into the business of professional wrestling during the mid-twentieth century and how it connects to racial, gender, class, and national identity.

*Natural Language Processing for Social Media* Anna Atefeh Farzindar, Diana Inkpen, 2020-04-10 In recent years, online social networking has revolutionized interpersonal communication. The newer research on language analysis in social media has been increasingly focusing on the latter's impact on our daily lives, both on a personal and a professional level. Natural language processing (NLP) is one of the most promising avenues for social media data processing. It is a scientific challenge to develop powerful methods and algorithms that extract relevant information from a large volume of data coming from multiple sources and languages in various formats or in free form. This book will discuss the challenges in analyzing social media texts in contrast with traditional documents. Research methods in information extraction, automatic categorization, and clustering, automatic summarization, and indexing, and statistical machine translation need to be adapted to a new kind of data. This book reviews the current research on NLP tools and methods for processing the non-traditional information from social media data that is available in large amounts, and it shows how innovative NLP approaches can

integrate appropriate linguistic information in various fields such as social media monitoring health care and business intelligence The book further covers the existing evaluation metrics for NLP and social media applications and the new efforts in evaluation campaigns or shared tasks on new datasets collected from social media Such tasks are organized by the Association for Computational Linguistics such as SemEval tasks the National Institute of Standards and Technology via the Text REtrieval Conference TREC and the Text Analysis Conference TAC or the Conference and Labs of the Evaluation Forum CLEF In this third edition of the book the authors added information about recent progress in NLP for social media applications including more about the modern techniques provided by deep neural networks DNNs for modeling language and analyzing social media data Natural Language Processing for Social Media, Third Edition Anna Atefeh Farzindar,Diana Inkpen,2022-05-31 In recent years online social networking has revolutionized interpersonal communication The newer research on language analysis in social media has been increasingly focusing on the latter s impact on our daily lives both on a personal and a professional level Natural language processing NLP is one of the most promising avenues for social media data processing It is a scientific challenge to develop powerful methods and algorithms that extract relevant information from a large volume of data coming from multiple sources and languages in various formats or in free form This book will discuss the challenges in analyzing social media texts in contrast with traditional documents Research methods in information extraction automatic categorization and clustering automatic summarization and indexing and statistical machine translation need to be adapted to a new kind of data This book reviews the current research on NLP tools and methods for processing the non traditional information from social media data that is available in large amounts and it shows how innovative NLP approaches can integrate appropriate linguistic information in various fields such as social media monitoring health care and business intelligence The book further covers the existing evaluation metrics for NLP and social media applications and the new efforts in evaluation campaigns or shared tasks on new datasets collected from social media Such tasks are organized by the Association for Computational Linguistics such as SemEval tasks the National Institute of Standards and Technology via the Text REtrieval Conference TREC and the Text Analysis Conference TAC or the Conference and Labs of the Evaluation Forum CLEF In this third edition of the book the authors added information about recent progress in NLP for social media applications including more about the modern techniques provided by deep neural networks DNNs for modeling language and analyzing social media data Living With Hacktivism Vasileios Karagiannopoulos,2018-03-05 This book focuses on the phenomenon of hacktivism and how it has been dealt with up to now in the United States and the United Kingdom After discussing the birth of the phenomenon and the various relevant groups from Electronic Disturbance Theater to Anonymous their philosophies and tactics this timely and original work attempts to identify the positive and negative aspects hacktivism through an analysis of free speech and civil disobedience theory Engaging in this process clarifies the dual nature of hacktivism highlighting its potential for positive contributions to contemporary politics whilst also

demonstrating the risks and harms flowing from its controversial and legally ambiguous nature Based on this hybrid nature of hacktivism Karagiannopoulos proceeds to offer a critique of the current responses towards such practices and their potential for preserving the positive elements whilst mitigating the risks and harms involved in such political practices Finally the study focuses on identifying an alternative symbiotic rationale for responding to hacktivism based on a cluster of micro interventions moving away from the conflict based criminal justice model and the potentially unjust and inefficacious results it entails Library of Congress Information Bulletin ,2009
