ROBERT R. SOKAL,F. James Rohlf,2013-12-20 Suitable for undergraduates with a minimal background in mathematics this introduction ranges from descriptive statistics to fundamental distributions and the testing of hypotheses Includes numerous worked out problems and examples 1987 edition **An Introduction to Biostatistics** Thomas Glover,Kevin Mitchell,2015-06-29 For over a decade Glover and Mitchell have provided life sciences students with an accessible complete introduction to the use of statistics in their disciplines The authors emphasize the relationships between probability probability distributions and hypothesis testing using both parametric and nonparametric analyses Copious examples throughout the text apply concepts and theories to real questions faced by researchers in biology environmental science biochemistry and health sciences Dozens of examples and problems are new to the Third Edition as are Concept Checks short questions that allow readers to immediately gauge their mastery of the topics presented Regardless of mathematical background all readers will appreciate the value of statistics as a fundamental quantitative skill for the life sciences *Introductory Biostatistics for the Health Sciences* Robert C. Duncan,Rebecca Grant Knapp,M. Clinton Miller,1977 [An Introduction to Biostatistics](#) Thomas Glover,Kevin Mitchell,2008 Statistical analysis is increasingly being recognized as a fundamental quantitative skill for all biology students to master This accessible text provides the necessary foundation for them to do just that Glover and Mitchell emphasize the application of statistics using examples from many

areas of the life sciences but without sacrificing theoretical rigor Along with standard parametric analyses many examples of nonparametric analysis are incorporated to better simulate the situations that undergraduates encounter in their own research projects and to accommodate those readers with more modest backgrounds in mathematics A large number of end of chapter problems provide ample opportunities to apply the concepts presented in the text
