based on a user interface library called SAPUI5 This library helps developers to create uniform looking RIAs To test their graphical user interface and ensure quality software our approach supports this testing process by using a web crawler known from search engines to automatically infer a specification or model from these interfaces We achieved this by modifying the Ajax capable crawler Crawljax by A Mesbah and using a new more efficient and modular state abstraction based on XPath expressions Our CrawljaxXT also addresses many bugs and shortcomings of the original Crawljax and thus allows for reliable creation of complete user interface models without overly detailed state abstractions Concluding we successfully evaluated our mined models and its testing capabilities with a modified version of the free model based testing tool Graphwalker   Introduction to SAP Business One Peter Maagaard Pedersen,Aarhus School of Business, Aarhus University.
