Andrew McEachern,Daniel Ashlock,2022-05-31 A problem factory consists of a traditional mathematical analysis of a type of  
problem that describes many ideally all ways that the problems of that type can be cast in a fashion that allows teachers or  
parents to generate problems for enrichment exercises tests and classwork Some problem factories are easier than others for  
a teacher or parent to apply so we also include banks of example problems for users This text goes through the definition of a  
problem factory in detail and works through many examples of problem factories It gives banks of questions generated using  
each of the examples of problem factories both the easy ones and the hard ones This text looks at sequence extension
